VOLUME II.

1883-1884.

AN EPIGRAPHICAL JOURNEY IN ASIA MINOR.

By J. R. SITLINGTON STERRETT, PH.D.

BOSTON:
DAMRELL AND UPHAM.
1888.

P R E F A C E.

THE expenses of the journey in Asia Minor, the results of which are contained in this volume, were borne by myself, with the exception of one hundred and fifty dollars, which were contributed by gentlemen in Boston.

The inscriptions in whose headings no reference is made to a previous publication are new. Those in whose headings reference is made to some publication have been published before, but with inaccuracies.

The square brackets [] mean that what is inclosed between them was originally on the stone, but having become defaced has been supplied by me. The round brackets () mean that what is inclosed between them was never on the stone, *i.e.* either that the word was abbreviated on the stone and has been written out in full, or else that an error of the stonecutter has been corrected by me. The broken brackets < > mean that what is inclosed between them is on the stone, but that it is redundant.

The following Turkish terms need explanation : —

Ak, white.

Ashagha, lower.

Aghatch, a Tree.

Bash, a Head.

Bel, a Pass, generally low and broad;
see *Gedik*.

Bunar, a living Spring; see *Puñar*.

Boghaz, literally a Throat, applied
to defiles that lead up to a Pass
(*Bel* or *Gedik*).

Böyük, large, big.

Dagh, a Mountain.

<i>Dere</i> , a Valley, broad or narrow ; applied also to Cañons.	<i>Mesdjid</i> , a small parish Mosque.
<i>Djami</i> , a Mosque.	<i>Monastir</i> , a Christian Convent.
<i>Düden</i> , a Place where water sinks under the Ground ; <i>Kapaßóßpa</i> .	<i>Ören</i> , Ruins.
<i>Eski</i> , old.	<i>Orta</i> , middle.
<i>Gedik</i> , literally a Notch, applied to a Pass where the mountains rise up on both sides like a saddle ; see <i>Bel</i> .	<i>Ova</i> , a Plain.
<i>Gök</i> , blue.	<i>Puñar</i> , a Variation of <i>Bunar</i> .
<i>Göl</i> , a Lake.	<i>Sari</i> , yellow.
<i>Hissar</i> , a Castle.	<i>Shehir</i> , a Town.
<i>Indje</i> , narrow.	<i>Sivri</i> , pointed, peaked ; applied to sharp, abrupt mountain Peaks.
<i>İrmak</i> , a large River.	<i>Su</i> , literally Water ; applied also to large Rivers.
<i>Kale</i> , a Castle.	<i>Tash</i> , a Stone.
<i>Kara</i> , black.	<i>Tchai</i> , a small River.
<i>Kassaba</i> , a Market Town.	<i>Tcheshme</i> , an artificial Fountain ; see <i>Bunar</i> .
<i>Kaya</i> , a Rock.	<i>Tekke</i> , a Mohammedan Convent.
<i>Khan</i> , a Caravansary.	<i>Tepe</i> , a Hill.
<i>Kieui</i> , a Village.	<i>Toprak</i> , Field, Soil.
<i>Kilisse</i> , a Church.	<i>Turbe</i> , a Mausoleum or Chapel built over a Tomb.
<i>Kishla</i> , Winter Quarters.	<i>Ulu</i> , large.
<i>Kizil</i> , red.	<i>Uzun</i> , long.
<i>Köprü</i> , a Bridge.	<i>Veran</i> or <i>Viran</i> , Ruins, ancient Site.
<i>Kütchük</i> , small.	<i>Yaila</i> , Summer Quarters.
<i>Kuyu</i> , a Well.	<i>Yazılı</i> , inscribed.
<i>Medressi</i> , a College for the Study of Law and Divinity.	<i>Yeni</i> or <i>Yeñi</i> , new.
	<i>Yer</i> , Earth, Dirt.
	<i>Yokara</i> , upper.

I desire to tender again to Professor Heinrich Kiepert, of the University of Berlin, my most hearty thanks for the cartographical construction of my routes from observations and measurements made by me in the field.

The first part of my road-notes were turned over to Professor W. M. Ramsay, according to our agreement, by which the geographical results of that part of the journey during which we worked together were to belong to him, and the epigraphical results to me. Accordingly, my routes begin at Isparta, the point where I ceased to give my road-notes to Mr. Ramsay.

The routes made on the journey from Isparta to Ak Serai are laid down on the large map which accompanies the *Wolfe Expedition to Asia Minor*. The routes made on the journey from Ak Serai to the Euphrates, and from the Euphrates to Angora, are given in the two maps which accompany the present volume.

In editing this volume I have had suggestions from W. M. Ramsay, F. D. Allen, Th. Mommsen, B. Pick, and my lamented friend, J. McKeen Lewis.

J. R. SITLINGTON STERRETT.

June, 1888.

AN
EPIGRAPHICAL JOURNEY
IN ASIA MINOR,
DURING THE SUMMER OF 1884.

BY
J. R. SITLINGTON STERRETT.

AN

EPIGRAPHICAL JOURNEY IN ASIA MINOR.

IN the fall of 1883 I was in Smyrna, having just returned from my summer's work with W. M. Ramsay, Esq., in Phrygia. I was making preparations to return to the interior on a journey of my own, when I received a telegram from Professor L. R. Packard, then Director of the American School of Classical Studies at Athens, requesting me to come to Athens immediately in order to assist him in the School. I went to Athens at his call, but with the determination to indemnify myself for the journey I had to abandon by undertaking a more extended tour at my own expense during the summer of 1884. Fortunately I was able to carry out my plans, and this present volume embodies the results of that journey. Mr. Ramsay had also made arrangements for spending this summer of 1884 in archæological research in Asia Minor, and it seemed expedient for us to work in concert as long as the general plan of our journeys would allow, for thus a greater extent of country could be explored systematically.

In pursuance then of our agreement we met in Smyrna on May 15th, 1884, where I provided myself with the necessary travelling outfit. I then went to Aïdin Giuzel Hissar, the ancient Tralleis, to buy horses and make other final arrangements.

Mr. Ramsay, who was to be accompanied by A. H. Smith, Esq., of Cambridge, England, was detained in Smyrna, and in the meantime I undertook an excursion in the direction of Nazli, during which I copied the first four inscriptions.

No. 1.

*Kiosk. On a round pedestal in a café. It is broken at the top and bottom, there being some faint traces of a line at the bottom but none at the top. The Alpha bars vary as indicated.*¹

 ἡγ', ἐν Λυκίᾳ δὲ καὶ Παμφυλίᾳ

¹ Ligatures occur: line 2, MH; line 3, HN bis; 4, HNK; 5, NE; 8, HN. In line 2 the O between Γ and N is small, as is also line 10 the Ω between Ι and Ν. In line 10 there was probably a horizontal bar connecting Ι and Ε; in other words, the two letters were ΗΕ in ligature, but this is conjecture, as I failed to see such a connecting bar, and my copy has ΙΕ as given above.

κς', βουλευτήν δὲ Ἀντιοχέ-
ων καὶ Ἡρακλεωτῶν, γερου-
10 σιαστήν δὲ Μειλ[η]σίων.

.

This inscription is a replica of one found in 1866 in the theatre of Tralleis, and published by Waddington from a copy of Salvetti. The first two lines have been restored from the inscription of Tralleis [Le Bas-Waddington, *Voyage Archéologique*, 1652 b].

NO. 2.

Kiosk. On a large round pedestal in the cemetery. A large segment has been broken out of the pedestal, and with it has disappeared the left side of the inscription. Cf. Le Bas-Waddington, Voyage Archéologique, 600 a. C.I.G. 2942 d.¹

 υἱὸς, Ἑρμόδωρος
 ἀρετῆς ἕνεκα καὶ τῇ[ς]
 εἰς τὴν [πόλιν εὐ]νοί[ας].

The reading of line 1 is certain. Mr. Waddington (loc. cit.) conjectures ΑΛΚΙΒΙΑΔΗΝ, and identifies him with the person mentioned *C.I.G.* 2947, 2948. The name Ἀλκιπάλῃς is certainly strange, but still not more so than many others that occur on Asiatic soil.

No. 4.

At a fountain by the roadside one hour west of Kiösk. It is a long rectangular stone, with a fragmentary inscription in two columns. The left end of the stone is broken away, and with it the commencement of the lines of the inscription forming Column I. The letters of this inscription are larger than those of its mate in Column II., which has been much worn away by the action of water. Cf. Le Bas-Waddington, Voyage Archéologique, 1652; My Preliminary Report, p. 4.

This inscription is a fragment of a letter of one of the later kings, possibly Antiochus the Great, in regard to the people of Hieria Kome and the sanctuary of Apollo.

At Kuyudjak I met Messrs. Ramsay and Smith. From this point our final start was made, going by way of Antiochia to Aphrodisias, the modern Geira.

Antiochia has disappeared entirely, it seems, and from the villages of this region we collected only a few insignificant inscriptions.

No. 5.

A large number of inscriptions from Geïra (Aphrodisias) have been published already, and consequently we could not hope for great epigraphical gain unless we should spend a number of days among the ruins, in order to sift the new from the old, the unknown from the known inscriptions. But time pressed, and we reluctantly abandoned the plan of investigating the site carefully. Still our visit was not wholly without fruit.

¹ ΝΓ are in ligature.

No. 9.

Geira [Aphrodisias]. Slab with mouldings: length inside the mouldings, 0.75 m. (including the moulding, 0.88 m.), height within the moulding, 0.55 m. (including moulding, 0.69 m). Copied by J. R. S. S.; copy verified by W. M. Ramsay.

ZΘΞΑΔΙΜΟΛΟΞΘΟΧΘΡΟΞ
ΟΚΙΛΑΡΑΖΕΘΝΜΝΙΑΞΧΑΡΙΝ

B.¹

ΕΛΠΙΞΠΑΡΟΔΙΤΑΙΞΧΕΡΙΝ

A.

Ζωσᾶδι Μολοσῶ ὁ χῶρος
ὁ Κιλαραζέων μνίας χάριν.

“The country of the Kilarazeis to Zosas Molosos, by way of remembrance.”

B.

Ἑλπίς παροδίταις χέριν.

“Elpis greets the passers-by.”

The name Ζωσᾶς occurs *C.I.G.* 3665, but neither is this form or the form Ζωσᾶς, — ᾶτος common in Greek onomatology (see *Revue Archéologique*, 1878, XXXVI. p. 318, and Letronne, *Inscriptions Grecques et Romaines de l’Egypte*, II. p. 457).

Possibly the ΖΘΞΑΔΙ of our inscription may be a mistake for ΖΘΞΑΤΙ or ΖΘΞΑΔΗ. The form Ζωσάδης occurs in an inscription of Athens in Φιλίστωρ III. p. 568.

May 29. Geïra to Makuf, 4 h. 40 m. The plateau upon which Aphrodisias was situated contracts gradually as one advances, until it strikes the foot of a spur of Baba Dagħ immediately beyond Besh Kavaklar. We cross this spur of Baba Dagħ, and in 2 h. 15 m. from Besh Kavaklar we reach its foot in the Davas Ova. Traversing the plain we reach Kara Hissar in 35 m.

¹ In line 3, ΧΕΡΙΝ stands for ΧΑΙΡΕΙΝ.

No. 13.

Kara Hissar. Block now used as a mouth-piece to a well near the village. Length, 1.10 m.; width, 0.90 m., height of letters, 0.06 m.

 ου γενομ[ένου] ἀρχιάτ[ρου καὶ]
 [στεφανηφόρου] τοῦ κυρίου Κ[αίσαρος].

Concerning the ἀρχίατρος, see Marquardt, *Privatleben*, II. p. 755, No. 4; Le Bas-Waddington, *Voyage Archéologique*, 1695; *C.I.G.* 3953 h; *Bulletin de Correspondance Hellénique*, 1883, p. 360, 1885, p. 337, No. 20.

The office of στεφανηφόρος is connected with that of the ἀρχίατρος in an inscription of Heraclea given in *Bulletin de Correspondance Hellénique*, 1885, p. 337, No. 20, so that it must probably be restored here.

Travelling east from Kara Hissar we reach Makuf, the site of the ancient Heraclea (see Le Bas-Waddington, *Voyage Archéologique*, 1695, and *Bulletin de Correspondance Hellénique*, 1885, p. 330), in 22 m.

The Stadion at Heraclea is still very distinct. The Acropolis is a low hill of great extent on top. The walls of the Acropolis are

easily followed around the whole circuit. In some places they are level with the ground, while in others they are still erect. The walls have been destroyed and then rebuilt, as is clear from the architectural fragments, and even inscribed stones which are built into the present wall. But that the foundations of the wall date from a comparatively early period is shown by the fact that on the outside the wall is provided with finely executed stone shoots at the bottom to carry the water off. Still, it must be noted that, at a place where the wall is now used as a quarry by the villagers of Makuf, I discovered an honorary inscription (No. 15) in the very foundation. The walls were evidently rebuilt in time of great and pressing need, when the anxious citizens made use of anything in the shape of stone that came in their way.

No. 14.

Makuf [Heraclea]. Near the Acropolis walls and close to the Stadion. The stone is unpolished and very roughly hewn. See my Preliminary Report, pp. 4, 5. Shortly after its appearance in the Preliminary Report the inscription was also published in the Bulletin de Correspondance Hellénique, 1885, p. 332. I had to copy the inscription in a rain and could not read the last lines given by the French gentlemen, who saw the stone under more propitious circumstances. It is 0.41 m. in height; 0.50 m. in width.

Line 3. The *Bulletin* reads ΑΥΡΗΛΙΑΙ instead of ΑΥΡΗΛΙΑ.

Line 5. The *Bulletin* reads ΕΝΤΑΨΕ for ΕΝΘΑΨΕ; and in line 6, ΕΝΤΑΨΑC instead of ΕΝΘΑΨΑC. On the contrary, the reading of the *Bulletin* at the end of line 5, ΕΠΕ is certainly more accurate than my ΕΙΤC.

NO. 15.

Makuf. Quadrangular cippus in the wall of the Acropolis.

Two similar inscriptions from Makuf have been published in the *Bulletin de Correspondance Hellénique*, 1885, pp. 338–339, one of which is in honor of Hieronis, and the other in honor of Apollonios himself.

Concerning the conferring of honors, such as those mentioned in this inscription, upon women, see *C.I.G.* 3415, 3953 c and d; Curtius, *Beiträge zur Geschichte und Topographie Kleinasiens*, p. 62; *Bulletin de Correspondance Hellénique*, 1885, p. 339; *Journal of Philology*, XI. p. 143.

No. 16.

Makuf. Cippus lying by the side of the Acropolis walls.

Length, 1.27 m., width, 0.33 m.

No. 18.

Alakuf. In the wall of the so-called Kale. Two panels side by side on the same stone. The left panel is broken through the middle of the inscription. The right panel has been published in the Bulletin de Correspondance Hellénique, 1885, p. 341.¹

A.

B.

¹ Ligatures occur in B: line 1, ΜΗ; line 2, ΗΚ, ΗΗΓ

A.

— ∪ ∪]ον κατέχει [κλυ]τὸν ἔμπορον οὐτ[ος ὁ τ]ύνβος
 ὁ[ς] δ' οἶκον ∪ ∪ η τέκνω μίγα καὶ [συνο]μεύνω,
 καὶ διὰ τῆς [στή]λης “χαῖρε” λέγει [π]αρόδοις.

B.

Ἔτους θτ', μη(νὸς) Λώου δ'.
 Ἡ θήκη ἡγοράσθη ὑπὸ
 Μάρ(κου) Αὐρ(ηλίου) Ἀττάλου
 Τατᾶ, εἰς ἣν ταφήσε
 τε αὐτός.

If the era be that of *Sulla*, then the inscription dates from the year 225 A.D.; if the era be that of *Cibyra*, then the inscription dates from 334 A.D. The former is most probably the true date.

In *A*, line 4, ΜΙΓΑ is the adverb *with*.

No. 19.

Makuf. In the wall of the Acropolis; the stone is very rough and was never polished. Bulletin de Correspondance Hellénique, 1885, p. 340.

* Φ

Ἡ θήκη ἐστὶ[ν] Νεικίου τοῦ Μελ[ι-]
 [τ]ινῆς, ἐν ᾗ τεθήσεται αὐτὸς
 Νεικίας· ἕτερος δὲ οὐδεὶς,
 [ἐ]πεὶ ὁ [ἐ]πεισβ[ι]ασάμενος ἀπο-
 [τ]είσει [τ]ῷ κυριακῷ φύσκῳ
 (δηάρια πεντακόσια).

Descent is very rarely reckoned *μητρόθεν*. It may be doubted whether it be the case here or not. At any rate we know from No. 15 that women held office in Heraclea, and it may be that Melitine was one of these distinguished women from whom it was an honor to reckon descent. It seems improbable that the town Melitene in Eastern Cappadocia is referred to in this inscription.

For *ἐπεισβιάμενος*, see *C.I.G.* 3996, 4007, 4190, 4360 *n.*, etc.

NO. 22.

Makuf. Stone forming a step in the doorway of a house.
Elegiac distich.

Θ Α Υ Ε Μ Ε Τ Η Ν Ν Ε Ι Κ Η Ν Σ Ε Ν Ι
Ο Ξ Ξ Ε Ν Ε Χ Α Ι Ρ Ε Π Ο Ρ Ε Υ Τ Ο Υ Μ Η
Δ Ε Ν Μ Ε Μ Υ Α Μ Ε Ν Ο Ξ Τ Η Ν
Ι Δ Ι Α Ν Α Λ Ο Χ Ο Ν

Θάψε με, τὴν Νείκην, Ξένιος· ξένε χαῖρε πορευτοῦ
μηδὲν μεμψάμενος τὴν ἰδίαν ἄλοχον.

The reading ΠΟΡΕΥΤΟΥ is certain. If *πορευτὸν* or *πορευτὸς* can be made to mean *journey*, then the sense might be: *Xenios buried me, Nike. Prosper, stranger, in thy journey, and think kindly of thine own wife.*

NOS. 23-24.

Makuf. *C.I.G.* 3953 *b.* from a copy of Schönborn.

The inscriptions must read :

A.

[Ἡ βουλ]ῇ καὶ ὁ δῆμος
Γλύκωνα Σωσ[θέ]νους κτί-
στην κ[αὶ] εὐε[ργέ]την τῇ[s]
π[όλ]εως
[κ]ατ[ὰ] τὴν τοῦ Γλύκωνος
διαθήκην.

 Μελίτιον Χαρ[μί]δου, γυναῖκα
 Γλύκωνος Σω[σθ]ένους
 κατὰ τὴν το[ῦ] Γλύκωνος
 διαθήκην.

The above inscriptions are published (badly) in the *Bulletin de Correspondance Hellénique*, 1886, p. 519, as coming from Acharkieui near Tralleis.

May 30. Makuf to Davas, 4 h. 30 m. From Heraclea I journeyed to the southeast and south through the plain now known as Davas Ova, passing Tilkily and Karakieui, and made as good a survey of the district as I could. I visited Tabae, now Davas, but found no inscriptions, and but few traces of an antiquity other than Turkish. Tabae is situated on a high hill in a gorge between two mountains, and is surrounded by cañons three or four hundred feet deep on all sides except one. On this one side it is approached by a bridge, which crosses a chasm where it is least deep; after the bridge is crossed a narrow neck of land, just wide enough for a roomy road, leads by a tortuous and laborious ascent to the town on the hill. When seen from any point in the plain, Davas seems to be situated on a neck or saddle of the mountains, and one is extremely surprised at the real topography of the place.

May 31. Davas to Medet, 4 h. 45 m. The plain of Tabae is one of extraordinary fertility; in antiquity it supported three cities, Heraclea, Tabae, and a third at Medet, to which Messrs. Paris and Holleaux give the name of Apollonia (see *Bulletin de Correspondance Hellénique*, 1885, p. 342 sqq.). The inscriptions published by these gentlemen (*Bulletin de Correspondance Hellénique*, 1885, p. 344 sqq.) were copied by me also (see my *Preliminary Report*, p. 6).

That Apollonia was a town of considerable importance and wealth is clear from a very substantial antique substructure in huge hewn stones of blue limestone. Upon these foundations there now stands the Mosque, which has without doubt superseded a prouder structure in honor of a pagan god. The neighboring hill, which certainly served as the Acropolis, contains no traces of antiquity, except the many architectural fragments of great weight and size which are found in the cemetery.

June 1. Medet *via* Kizildje to Kizildje Beilik, 6 h. 3 m. The distance from Medet to Kizildje is 2 h. 20 m. Immediately east of Uzun Puñar we begin the ascent of the mountain which lies between Medet and Kizildje. The following inscription found at Kizildje identifies the site as that of Sebastopolis.

No. 25.

Kizildje [Sebastopolis]. In the wall of the Djami. Length, 1.25 m., width, 0.50 m. See my Preliminary Report, p. 6.¹

 19 περιέχει.

Lines 15-16, ΓΕΝΑΜΕΝΟΞ is certain; for this form see Ahrens, *Dial.* II. p. 305; Kühner, *Ausführliche Grammatik*, I. p. 568, Anmerk. 4; and *Mittheilungen des Deutschen Archaeologischen Instituts*, 1881, p. 258. Line 16, X is probably *, the 'sign for Denars; the number of the Denars is σμα' (=241). In line 17 I have placed the stroke below the ,δ, making it 4000, inasmuch as δ' (4) seems too small.

 τῆς ἐπιγραφῆς ἀντίγ]ραφον ἀπετέ[θη εἰς τὰ
 ἀρχαῖα, ἔτους] κθ', μη(νὸς) β'.

The inscription dates from the year 55 B.C., which corresponds with the year 29 of the era of Sulla, or 52 A.D., which corresponds with the year 29 of the era of Cibra.

From Kizildje we return to the neighborhood of Medet, and thence to Kizildje Beilik, the time occupied between Kizildje and Kizildje Beilik being 3 h. 43 m.

June 2. Kizildje Beilik to Kizil Hissar, 5 h. 43 m. We follow up the Harpasus River, and in 4 h. 9 m. the watershed is reached in the neighborhood of Sarai Ova. A descent of 20 m. brings us to the extreme northwestern corner of the Karayuk Bazar Ova. From this point there is a gentle descent until within a short distance of Kizil Hissar, which is situated at the western edge of the plain on the slopes of the mountain. The distance from the watershed near Sarai Ova to Kizil Hissar is 1 h. 34 m. I was detained a day at Kizil Hissar, waiting for Messrs. Ramsay and Smith, who found it impossible to be punctual.

June 4. Kizil Hissar, *via* Yüreghil, Yataghan, Kuyudjak, Kaibazar, Avshar, to Güine, 6 h. 34 m. One hour's travel brings us to the easternmost limit of the plain. Henceforward the country is rolling, the above-mentioned villages lying in narrow valleys, each with a little stream of water. Kaibazar is a large and prosperous village. Güine is situated at the northern edge of a little valley, that is hemmed in on all sides by mountains, except that the water finds an exit through a narrow gorge to the west.

June 5. Güine, *via* Dodru Agha, Yazir, Gümüş, Gumavshar, to Tchamkieui, 6 h. 33 m. Leaving Güine we traverse the little valley mentioned above, and cross a mountain ridge to a narrow valley which leads west to Derekieui. Here are the ruins of an ancient town. We continue to head nearly southeast, crossing a mountain

ridge to Dodru Agha. The distance from Güine to Dodru Agha is 3 h. 33 m.

No. 27.

Dodru Agha. In the wall of the Djami; length, 0.42 m.; height, 0.30 m. Impression.¹

τον Πισιδικῶν.

In *C.I.G.* 4380 *r* and *s* Franz gets rid of ΤΥΧΟΙΤΟΝ very unmethodically in *two* different ways. It is probably Pisidian Syntax for τύχοιεν (see Kühner, *Ausführliche Grammatik*, II, p. 18). At the date of this inscription the Dual was obsolete. "If any one violates the tomb, let *them* suffer for it at the hands of the Gods."

The two inscriptions which follow present two more examples of τύχοιτον, whatever it is.

Concerning the late form ἤτω, see Kühner, *Ausführl. Gram.*, I. p. 666, 3.

About midway between Dodru Agha, on and around a small hill, there are sarcophagi and other traces of an ancient town. In the mosque of Yazir there are many ancient stones; sarcophagi are abundant, and I noticed the capital of a column belonging to the Christian period.

From Dodru Agha to Tchamkieui the time is three hours. Leaving Gümavshar we cross a low brushy barren hill to Tchamkieui. Here I met Messrs. Ramsay and Smith, who have explored the Karayuk Bazar Ova. During our separation of two days they had found the following six inscriptions.

NO. 32.

Karayuk Bazar. Millarium forming part of a fountain outside of the town. Diameter, 21 inches. Copied by A. H. Smith and W. M. Ramsay.

 λωδος Πλεύρου
 Μάνηδι καὶ Χο[ρ]δάδῃ.

The inscription is puzzling, and the last four names are new and strange.

¹ Ligature of NH in line 3.

June 6. Tchamkieui to Derekieui, 2 h. 54 m. We retrace our steps to the neighborhood of Gümavshar, and thence to Derekieui, passing around a high mountain on our right. At Yaghmur Tash (= stone rain) the plain is strewn with many huge bowlders, having been precipitated down from the almost perpendicular heights. The plain here really looks as though it had rained stones. Half an hour north of Derekieui in the plain there are substantial foundations, possibly of a temple. On the top of the mountain immediately east of Derekieui the villagers report a Kale and inscriptions, but having promised to meet Messrs. Ramsay and Smith at a fixed time, it was not possible for me to investigate the site.

June 7. Derekieui to Karamanlü, 8 h. 36 m. Leaving Derekieui we went up the narrow valley and passed the ruins mentioned on June 5. Thence we recross the mountain ridge to Dodru Agha. Leaving Dodru Agha, 33 m. travel east over a rough country brings us to the foot of the high, rugged, and in places almost impassable Eshler Dagh. After a climb of 3 h. 50 m. the final summit of the mountain is reached. A descent of 1 h. 39 m. brings us to the foot of the Eshler Dagh, at the westernmost limit of the plain of Karamanlü. Thence, passing Gultchan, we reach Karamanlü in 1 h. 26 m.

Nos. 38-40.

Karamanlü. Quadrangular cippus at the fountain west of the village. Height, 1.45 m.; high between the mouldings, 1.05 m.; width, 0.50 m. Bulletin de Correspondance Hellénique, 1878, p. 246 sqq. Impressions.

23. The *Bulletin* declares the small O above the Λ a point.
 24. “ “ does not indicate the break in the upper part of the Y.
 26. “ “ reads ΔΡΑΥΚΩΝ.
 27. “ “ reads ΚΑΛΛΙΚΛΗ  and nothing more.
 28. “ “ omits and says “quatre ligues martelées”; there are
 but two wholly defaced lines, 29 and 30.
 31. The *Bulletin* read Ω  in fine, and does not discover that the
 ΝΟϚ around the corner is the end of the line.
 33. The *Bulletin* reads ΕΚ  in fine, and does not discover that the
 ΥΡΤΑ around the corner is the end of the line.
 34. The *Bulletin* reads ΕΤΡΑΤΩΝ'ΩΒΕΛΛΑΖΩΕΙ, and does not
 discover that the ΙΜΟΘΕΟΥ around the corner is the end of
 the line. After line 11 of inscription B, the *Bulletin* gives
 parts of the ends of lines 31, 33, 34 as belonging to inscrip-
 tion B, whereas in reality they belong to A, as indicated in
 my uncial text.

B.

On the second face of the same stone, but by a different stone-cutter. Bulletin de Correspondance Hellénique, 1878, p. 251.¹

¹ None of the lines were ever carried clear across the stone. Line 3 was never finished, owing, no doubt, to the carelessness of the engraver.

Nos. 47-50.

Karamanlû. Broken quadrangular cip̄pus in the cemetery.

The top moulding is broken entirely away. The whole present height of the stone is 1.09 m.; to the bottom moulding, 0.90 m.; width, 0.61 m. Bulletin de Correspondance Hellénique, 1878, p. 257 ff. Impressions.¹

¹ Ligatures occur: line 13, HN; line 16, HN; line 17, MH; line 19, WN, MH; line 22, MH; line 24, MH. The N at the end of line 27 is the numeral belonging to line 28, but is written for reasons known only to the stonecutter above the ✱.

Line 3. I lay no stress on the conjecture of *θυγατρὸς*; but if it be possible, it helps out of a difficulty. *Οὐμμηδίας* is miswritten for *Οὐμμυδίας*. The meaning of lines 14-17 is that the money shall be funded and the interest expended yearly.

June 8. Karamanlü to Tefeny, 1 h. 3 m. At Tefeny I again met Messrs. Ramsay and Smith. Here we copied the following inscriptions.

Nos. 53-55.

Tefeny. Quadrangular cippus in the cemetery. Height, 1.58 m.; within mouldings, 1.20 m.; width, 0.41 m. Bulletin de Correspondance Hellénique, 1878, p. 56 ff.; C.I.G. 4366 w. The inscriptions are so badly blurred by the gradual wearing away of the stone that impressions would be worthless. The reader will have to accept the texts on the united testimony of Mr. Ramsay and myself.

A.

Lines 1-25 copied by J. R. S. S., copy verified by W. M. Ramsay; lines 26-36 copied by W. M. Ramsay, copy verified by J. R. S. S.¹

¹ Ligatures occur: line 5, the second NE; line 6, NE; line 7, NE, HP; line 10, HP; line 14, HP, NE; line 18, MHN; line 19, MH; line 20, NE, HP; line 21, MHN; line 22, MHN; line 23, MHN; line 24, NE, MHN, NE; line 25, NE; line 28, NE; line 29, NE; line 30, MHN; line 31, MHN, MHN, NE; line 32, NE, NE; line 33, NE. In line 9, OYP occurs twice, and in both cases the Y is written above the line between O and P. In line 13 a small N is inserted between Y and Δ. In line 21 the Y of OYA is inserted above the line between O and Λ. In line 24 the OY at the end of the line is written above ΔΔ. In line 32 the O at the end of the line is written above the Δ.

Lines of C, 38 and 40. The name ΡΗΓΕΛΛΟC is certain in No. 72, A, line 11.

Nos. 56-58.

Tefeny. Quadrangular stone serving as a foundation for the wooden pillar which supports the portico of the House of Mehmet Bey. It is almost certainly inscribed on the fourth side also, but the stone cannot be removed without doing damage to the house. Its greatest present length is 0.97 m., width, 0.56 m. Published in the Bulletin de Correspondance Hellénique, 1884, p. 497 sqq.

A.

The commencement of the lines were copied by A. H. Smith and verified by J. R. S. S. I was suffering from the fever at the time and could not bear to lie on my stomach with my head in the hole below me, consequently I have had to rely upon the impression for the body of the inscription on this side. Fortunately it is good. Impression.¹

XX. γδδδδ ι[θ] [Ἑ]ρ[μ]οῦ Kερδενπόρου·
 μ βουλὴν σαῖσι φρεσὶν ν]ων ἐνεκ' ἔσται,

πάντα [δέ σοι ἐπι]τεύξῃ ἃ βούλει ἔ[χ]ω[ν].
 μαντεύῃ καὶ οὐθέν [σοι κακὸν ἔστ]αι
 XXI. σγγγδ ιθ'.

I. 5. The letters BOYΛ seem to invalidate the reading of the *Bulletin*, βου[λεται πρᾶξιν σ]οι. The reading καταθύμιος is not certain.

II. 3. The sense seems to be for ἀλλ' ἄρα μείνῃ in preference to οὐδ' ἄρα μείνῃ of the *Bulletin*.

4. The reading ἀδιαμήχανον is reasonably certain. Διαμηχανάομαι means *to bring about, to contrive*. The Fates advise him, who has just consulted the oracle, to abstain from the matter he may have in mind, because among other things it is difficult to contrive and execute it.

5. ἵ[πὸ δῆμον is almost perfectly certain.

III. 3. εἰς δεξιὰ χειρὸς is plain and distinct on the impression.

IV. 2. [ξ]είτης is certain, so that the remarks in the *Bulletin*, loc. cit. p. 506, IV., do not hold good throughout.

V. 3. πράξης cannot be disputed, for although the π is slightly blurred on the impression, still the letter is certain.

4. κατέχο[υσί σε] seems more probable than κατέχο[υσί γε].

VI. 3. λήμ]ψη δ' ἃ θέλεις must be read instead of ὑψηλὰ θέλεις.

VIII. 3. δρᾶσε is given by the *Bulletin* conjecturally. The Δ is not certain on the impression, but our copy gives the letter as certain (see *Bulletin*, p. 507, V.).

4. ἐνχείρει, imperative verb, must be read instead of ἐν χειρὶ.

XIX. 2. ἐνχείρει, imperative verb, must be read instead of ἐν χειρὶ, likewise ἐφ' ἐλπίδος instead of ἐπ' ἐλπίδος.

3. [ἀνασ]ώ[σ]αι seems to be demanded by the existing letters.

5. ἀπολήμψη must be read instead of ἀπολήμψη. ΗΜ are in ligature.

For a similar inscription see *Papers of the American School*, Vol. III. Nos. 339-342. See also *Hermes*, X. p. 193 sqq.: *Rhein. Mus.*, VII. p. 251; Kaibel, *Epigr. Graeca*, p. 455.

No. 59.

¹ Lines 1 and 2 are on the moulding. In line 3, NT are in ligature. In line 4, a small I is inserted above and between the E and C. In line 5, the H of NHC is written above the C. In line 6, the reading CWT)ΡΙΛC is certain, the stone-cutter having made an M by mistake instead of H. At the close of line 7, a Λ has been incised below the H; it can only belong to the name of the people, which in this instance must have two ΛΛ's.

 Αὐρ. Ἀλέξανδρος δις Ἀνδρέ[α].

Line 9. We have before us the same person mentioned in No. 53 C, line 41.

The name Ἰστράτων in line 17 is certain, but the Ι may be a mistake of the stonecutter, see No. 53 C, line 42. If not, we might assume that the natives of this region, like the Turks, felt it necessary to insert an Ι before initial Ξ, e.g. the Turkish *Ismir* [= Smyrna], *Isparta*, *Iskender*, *Istambul*, etc. Compare No. 38 C, line 10, Ἰσκάλου.

Nos. 60-61.

*Tefeny. Theatre seat in the cemetery. Copied by W. M. R. and J. R. S. S. Bulletin de Correspondance Hellénique, 1878, p. 171.*¹

¹ In B, line 2, MH are in ligature.

A.

On the back of the seat.

2. The *Bulletin* reads ΟΣΜΗΝΙΔΟΕΤ, and in a footnote says :
 "ΜΗΝΙΔ lettres liées."
3. The *Bulletin* reads ΜΕΓΑΝΒΡΙΟ, and does not indicate a
 break in fine.
5. The *Bulletin* reads ΜΗΝΙΤΟΑΗΕ.

C.

On the left side we could make out nothing whatever, and the copy as given in the *Bulletin de Correspondance Hellénique*, 1878, p. 171, gave us no help, for here as elsewhere in this district the copies of the *Bulletin* were constantly before us. Whereas we found the inscription on the left side of the seat illegible, but that on the back easy, the French gentlemen give a copy of the former and find the latter hopeless.

A.

B.

Ἀπολλώνι-
 ος Μηνὸς
 Μεσανβρίο[υ]
 ιερατείων
 5 Μηνὶ Τολησέ-
 ων εὐχάην.

A.

There can hardly be any doubt that the writer in the *Bulletin de Correspondance Hellénique* is right in considering that the era employed in this inscription and in others of this district is the Cibyritic, which has been fixed by M. Waddington (Le Bas-Waddington, *Voyage Archéologique*, 1213) to October, 25 A.D., not 25 B.C., as the writer in the *Bulletin de Correspondance Hellénique* (1878, p. 171 top) implies in his calculation.

Accordingly the dates given in this inscription, 236 and 237 (lines 1 and 4), correspond to the years 261 and 262 A.D.

Line 6. *τελίως* apparently stands for *τελέως*, *willingly*.

B.

"Apollonios, acting as priest of Men Mesanbrios, dedicates in discharge of a vow to Men of the Toleseis."

Two different gods Men are distinguished here; obviously they are the deities of two separate villages, one perhaps named Mesambria, and the other Tolesia (or possibly Todesia).

Var. Lect.

1. The *Bulletin* reads ΕΤΟΥΞ Τ ΖΙ.
3. “ “ reads ΜΩΩΑΛ.
4. “ “ reads ΝΤΙ in fine.

*Ετους τ[κ?]Ζ'

Αὐρ. Διονύσιος

δὲς Μοαλεῖδος

θεῶ Σώζοντι

εὐχὴν.

If the conjecture K in line 1 be right, the inscription belongs to the year 352 A.D. ; see the commentary on Nos. 60-61.

Concerning Θεὸς Σώζων, or simply Σώζων, see *Bulletin de Correspondance Hellénique*, 1878, p. 171, No. 2; 172, No. 4, but especially 1880, p. 291 sq., where M. Collignon rejects the supposition that Σώζων represents *death* in the shape of a horseman, and thinks that the stones bearing reliefs of a horseman (along with inscriptions) are merely votive offerings dedicated to a God. It is noteworthy that Θεὸς Σώζων is mentioned on coins of Themissonion, a fact which tells strongly in favor of the close relation between this district and that in which Cibyra and Themissonion are situated.

Nos. 72-75.

Hedje. Partly in Bulletin de Correspondance Hellénique, 1878, p. 255. C.I.G. 4367. Impressions.

A.

Copied by W. M. Ramsay; copy verified by A. H. Smith.¹

¹ The N at the end of line 30 is regarded by Mr. Ramsay as somewhat doubtful. In line 8 the letter between A and Ω is certainly T, not Γ.

 εὐκ[ήν].

At Kaldjik I bade a final farewell to Messrs. Ramsay and Smith. The general plan of my journey made it impossible for me to work longer in concert with them.

June 12. Kaldjik, *via* Bademli, Mussalar, Eïnesh, to Hadjilar, 5 h. 30 m. We traverse an open, rolling country along the north-western edge of the valley of the Gebren Tchai, a district blank on the old map, but which contains a number of villages.

No. 84.

Mussalar. Quadrangular cippus. Copy.

Nearly one hour east of Eïnesch is the site of an ancient town, now wholly deserted. The remains are not unworthy of notice. Among other things may be mentioned the tombs, most of which are round buildings, with massive stone foundations. These were probably *ἐξέδραι* or *ψαλίδες*. I have met with them also at Isaura Vetus and at Anabura (cf. *Papers of the American School*, Vol. III. No. 187 and p. 203; also Nos. 339-342. Mr. Ramsay identifies this site with "Palaiopolis, or Alieros, the latter being the native name" (cf. *American Journal of Archaeology*, Vol. III. p. 161).

June 15. Isparta to Egherdir, 5 h. 29 m. Leaving Isparta we traverse the plain whose topographical features are described in the *Papers of the American School*, Vol. III. p. 332. Near Güle Önü we head about east. Forty-five minutes east of Egherdir the watershed is reached. A sharp descent brings us to Egherdir, situated near the southwestern end of the lake which bears its name. Here I was shown two ancient steelyards. The four sides of the bronze beams were all different, each side being apparently intended for a different standard of weight. The great intervals corresponding to our one, two, three, etc., pound notches, were marked by letters of the Greek alphabet. From the style of the letters the steelyards must be placed in the late Roman or early Byzantine period. The heavy weight was a bronze head of Zeus, filled with lead. The workmanship of this head was much too good for the period mentioned. I could not buy them.

June 16. Egherdir to Gelendos, 7 h. 58 m. In 42 m. we cross the Boghaz Su by a bridge at its exit from Egherdir Göl. It is a strong, deep, and very rapid stream. I afterwards traced it up in 1885 (cf. *Papers of the American School*, Vol. III. pp. 309-310, and pp. 317-318). The road henceforth for four hours is very difficult. It follows in general the coast of the lake, and crosses a succession of spurs or benches of the mountain, which fall off more or less perpendicularly into the lake. A new road has been constructed recently: much blasting has been done, and abutments have been built where the road lies along the edge of the lake. In 4 h. 42 m. from Egherdir we reach the Devrend, which is situated just at the point where the rough road over the Deinir Kapu (called also Eyerim Bel) ceases. Henceforward the road lies in a plain. We pass a large Seldjuk Khan 50 m. north of the Devrend.

From this point on the reader may consult the large map in Vol. III. of the *Papers of the American School*.

June 17. Gelendos to Yalowadj, 5 h. 14 m. For the topographical details of this region of country, and for numerous inscriptions not given in this present volume, see the *Papers of the American School*, Vol. III. pp. 218-278.

Nos. 92-93.

Yalowadj (Antiochia Pisidiae). In the cemetery near the mill opposite Hissar, immediately on the road leading from Yalowadj to Ak Shehir, and thirty minutes distant from Yalowadj. Quadrangular cippus; inscription badly defaced. Copy.¹

My copy and impression justify the restorations of Henzen, but not Borghesi's conjecture of SOLLERTI in lines 1 and 2. While in the presence of the stone I made a note to the effect that the end of line 1 must be either SODI or SOSI, and now an inspection of the impression convinces me of the accuracy of my note. The letter immediately following SO cannot possibly be an L, and while a D might not be absolutely impossible, yet all the indications go to show that the letter must be an S. The letters of line 1 are larger than those of the following lines, and unfortunately no D occurs in it; but nevertheless it is safe to assert that the fragmentary letter in question is too narrow for a D, whereas it is of exactly the same size as the corresponding part of the two S's in line 1 and resembles them in every way.

The CAPPADOCIAE looked for by Mommsen in line 3 is certainly wanting: evidently the administrations of Cappadocia and Galatia were separate at this time.

 τοὺς ἑαυτο[ύς . . .]

No. 108 is inserted here because it adds to the list of names given in No. 107 that of C. Caristianus Fronto. An inscription of this same C. Caristianus Fronto has been published in the *Bulletin de Correspondance Hellénique*, 1886, p. 46, where he is πρεσβευτὴς αὐτοκράτορος as here, but from our inscription we learn that he was also ἀντιστράτηγος Λυκίας καὶ Παμφυλίας. In lines 7 and 8 of my No. 108 the name of the emperor has been erased. Now the name of Vespasian was never erased, and the remarks of Messrs. Cousin and Diehl (*Bulletin*, as cited p. 47) prove only that the period we have to deal with is that of the Flavian emperors. Vespasian is out of the question for the above reason, and consequently it is probable that the name of Domitian must be restored in No. 108. The *Bulletin*, as cited p. 47, also publishes an inscription of C. Caristianus Paulinus.

The incompleteness of Hamilton's copies of the two Dottius inscriptions (Nos. 113 and 114) is to be ascribed to his failure to notice the ligatures.

Concerning the ἀγῶνες ταλαντιαῖοι πενταετηρικοὶ, see Le Bas-Waddington, *Voyage Archéologique*, 1209, and *C.I.G.* 3208.

Concerning the Asiarchs at Ephesus, see Le Bas-Waddington, *Voyage Archéologique*, 158 a, 885, *C.I.G.* 2965, 2987 b; *Ephemeris Epigraphica*, I. p. 200-214; *Monatsberichte der königl. preussischen Akademie der Wissenschaften*, 1874, p. 12; *Revue Archéologique*,

1874, XXVIII. p. 10; *Bulletin de Correspondance Hellénique*, 1880, p. 375; 1878, p. 595; 1883, p. 264 and p. 450; 1886, p. 151; *Academy* [London], Aug. 11, 1883; *Papers of the American School at Athens*, Vol. I. p. 103; but *above all*, see the exhaustive study of Lightfoot, *Apostolic Fathers*, Part II. Volume II. Section II. pp. 987-998.

Concerning the Ἀδριάνεια, see *C.I.G.* 2987 b, 3208.

No. 130 above [= *C.I.L.* III. 296; Le Bas-Waddington, *Voyage Archéologique*, 1822] certainly has *Cermalus* as the name of the *vicus*, and consequently M. Waddington's conjecture of *Germanus* is untenable. Professor Mommsen tells me that Κέρμαλος is the writing of the Greeks and that *Cermalus* is the only true form, though not acknowledged by modern scholars. The known *vici* of Antiochia now number six, the names of which are given in the last six inscriptions, viz. *Tuscus*, *Cermalus*, *Aedilicius*, *Velabrus*, *Patricius*, *Salutaris*. It is a singular fact that the modern city of Yalowadj is composed of twelve¹ *vici*—called *Mahallûlar* [Mahallû being the Arabic word for "*Quarter*"]—and these modern *vici* may be an inheritance from antiquity.

NO. 116.

 στήλῃν ἀνέθη
 Κ[λ](αύδιος) Ἰούκουνδος

π[ω] ? συμβίω ?] Ἀλεξάν-
 δρω μνημοσύνης
 ἔνεκεν.

In lines 4-5 we naturally expect the name of a woman, not that of a man.

NO. 144.

Yalouadj. On a sarcophagus in the yard of a house. Copy.

On the top moulding of the side in one long line is the following : —

A.

ΕΙΔΕΤΙΣΤΟΝΤΟΠΟΝΗΛΑΡΝΑΚΑΤΗΝΔΕΑΔΙΚΗΣΕΙΟΡΦΑΝΑ
 ΤΕΚΝΑΙΠΟΙΕΡΗΜΟΝΕΝΤΥΡΙΤΥ

Εἰ δέ τις τὸν τόπον ἢ λάρνακα τήνδε ἀδικήσει,
 ὀρφανά τέκνα λίποι, [χῆρον βίον, οἶκον] ἔρημον,
 ἐν πυρὶ π[άντα δάμωτο, κακῶν ὑπὸ χεῖρ[ας ὀλ]οι[τ]ο.

In a panel occupying the centre of the side of the sarcophagus is this : —

B.

CΛΛΙΝΑCΑΤΟΥΡΝΙΝ
 ΓΥΝΗΑΥΤΟΥΖΩΝΤΕC
 ΚΑΙΦΡΟΝΟΥΝΤΕCΕΑΥ
 ΤΟΙCΤΗΝCΟΡΟΝΚΑΤΕ
 5 CΚΕΥΑCΑΝΜΝΗ
 ΜΗCΧΑΡΙΝ

Σαλίνα Σατουρνίν[α ἡ]
 γυνὴ αὐτοῦ ζῶντες
 καὶ φρονοῦντες εἰς
 τοῖς τὴν σορὸν κατε-
 σκεύασαν μνή-
 μης χάριν.

Apparently the inditer of the inscription was ignorant of the fact that the words between ὀρφανὰ τέκνα and χεῖρας ὄλοιτο form two hexameters, else he would have thrown the first part into verse (see *C.I.G.* 4000, also 3862, 3875, 3990^k). The name of the husband is wanting in the panel; an oversight of the stonecutter.

No. 145.

 χάριν.

The name Οὐιρία is new and is probably indigenous.

No. 146.

Yalowadj. Stele surmounted by a gable. In the western cemetery. Copy.

Π Ε Ι C W N T I
 T W T W I Δ I W
 A Δ Ε Λ Φ W I Ε
 Π Ο Λ Ε Ι Τ Η
 Λ Η C

Πείσων Τί-
 τω τῷ ἰδίῳ
 ἀδελφῷ Ἰε-
 [ρα]πολείτη
 [μνή]μης [χάρω].

It is, of course, impossible to determine which city is meant as the native town of Titus; if the city in the Sandükli Ovası be the one meant, then Ἰε[ρρ]πολείτη must be restored (see *Journal of Hellenic Studies*, 1882, p. 340 sqq., *Bulletin de Correspondance Hellénique*, 1882, p. 519); if the city in Phrygia Pacatiana be meant, then Ἰε[ρα]πολείτη would be correct.

No. 147.

Yalowadj. Large stone [1.49 m. × 0.80 m.; height of letters, 0.8 m.] serving as an abutment for the wooden staircase of a house. The feet of the staircase rest on the stone as indicated below. Copy.

For additional inscriptions of Yalowadj (Antiochia Pisidia) and the region of country around it, see the *Papers of the American School at Athens*, Vol. III. pp. 218-278.

The ruins of Antiochia Pisidia have been sufficiently described by former travellers, so that further mention by me is superfluous.

June 20. Yalowadj to Ak Shehir, 5 h. 42 m. Leaving Yalowadj the road leads over the Acropolis of Antiochia in 30 m. to Hissar. Thence we go up a narrow gorge, down which comes a stream of water. In 43 m. from Hissar the gorge divides: we follow neither arm, but ascend in abrupt zigzags the steep and rugged spur of the mountain which lies between the two gorges. A new road was just being constructed across the Sultan Dag between Yalowadj and Ak Shehir. It was finished in spots, and hundreds of men were still at work on it. It is of course superior to the old road, but the new road will still remain a trying and laborious one. This road between Yalowadj and Ak Shehir has hitherto been thought to be a pass. But it is a pass only in so far as deep gorges lead up to the great backbone of Sultan Dag on either side (see the large map in Vol. III. of *Papers of the American School at Athens*). The mountain sends off ridges without number at right angles to the mountain chain, and any two opposite gorges may be called a pass with as much propriety as the two which lie on opposite sides of the mountain between Yalowadj and Ak Shehir. The road reaches the great plain

of Philomelium one hour northwest of Ak Shehir, and consequently it does not go down the gorge, at the mouth of which the city of Ak Shehir lies.

No. 155.

Δ Ε Ι Ζ Ε Λ Ε Τ Α Ε Ι Ν
Ε Υ Χ Η Ν

But few remains of Greek antiquity are to be found at Philomelium; but, on the other hand, the traveller is surprised by some Seldjuk ruins of exquisite beauty. The accurate workmanship displayed, even in the execution of details, will compare favorably with Greek buildings of a good period.

At Ak Shehir I was joined, as had been previously arranged, by my friend, Professor J. H. Haynes, then of Robert College, Constantinople, now of the Central Turkey College, Aintab, Syria. Mr. Haynes accompanied me as photographer during the rest of the journey. My travelling-outfit had been left at Smyrna, and I had not fared well thus far. The advent of Mr. Haynes and the outfit was hailed with delight; for henceforward we could have substantial food, on which depends in great measure the success of an expedition like this.

June 21. Ak Shehir to Engilli, 1 h. 24 m. From Ak Shehir my route lay along the foot of Sultan Dagħ in a southeasterly direction to Dagħan Hissar. This region is very populous, and what is a blank mountainous space on the old maps is in reality a plain full of prosperous villages (see the large map in Vol. III. of the *Papers of the American School at Athens*).

June 23. Engilli to Dagħan Hissar, 5 h. 5 m. My route lay along the foot of Sultan Dagħ, and is indicated by the red line on the map. I found no inscriptions in the villages between Engilli and Kara Agha, but the topographical results were abundant.

Leaving Engilli Mr. Haynes passed through the villages Gedil, Aghayüt, Regiz, Ortakieui, Kotchash, Yazir, Tchetme, meeting me at Daghan Hissar. On this excursion he copied Nos. 163-173. The time occupied by Mr. Haynes between Engilli and Daghan Hissar was 4 h. 41 m. His route lay wholly in the plain, while mine crossed a succession of low spurs that run off from Sultan Dagh (see the map as cited above), but very near the point where the mountain ceases and the plain begins. This accounts for the fact that he made the trip in less time than I did (5 h. 5 m.), although my route was the straight line.

Daghan Hissar. On a sarcophagus used as a water-trough in a fountain near a Djami. Copy.

Α Ι Ν Ο Ν Κ Ν Ο Ι Ν
Μ Α Ν Ε Ι Δ Ο Κ Α Δ Ε Ι Τ Ο Υ

The inscription is apparently Phrygian; see the following inscription, No. 175.

Daghan Hissar is a modern town without any ancient remains.

June 24. Daghan Hissar to Ashagha Dinek, 4 h. 18 m. We again cross Sultan Dagh to the plain of Kara Aghatch, blank on the old maps, but now filled in by my journeys of 1884 and 1885 (see the map in *Papers of the American School*, Vol. III.). As will be seen from the map the road does not begin to cross Sultan Dagh from Daghan Hissar, as given on Tchihatcheff's map. In reality it goes up the gorge, at the mouth of which Kara Agha is situated. We ascend from Tchetme and join the true road in 36 m. The road crosses a real pass; the ascent on the eastern side is gentle but steady; the descent on the western side is sharper and more precipitous. The pass is low.

June 25. Ashagha Dinek to Yalowadj, 5 h. 50 m. We pass Oghras to Tcharük Serai.

No. 175.

Tcharük Serai (Ulumahallü). In the wall of a Djami. See my Preliminary Report, p. 11. Copy and impression.

 //B//CAESARIB

Side *B*, No. 4.

IMPCAS
 MARCAPO
 ETIMPCAES
 MAVRVAL
 MAXIMIANO
 PFAVG <////

It seems that Side *A* must fall into two fragments of inscriptions : the one having been partially hacked off to give place to a new one, which, in its turn, was left in an incomplete state. It is not easy to unravel Nos. 1 and 2, owing to the fact that No. 2 does not furnish data enough to justify an attempt at restoration. Accordingly I simply transcribe in minuscules the text as it stands on the stone :

Nos. 1 and 2.

(Duobus) d(ominis) n(ostris) Fl(avio) Cl(audio) Con-
 stantino Maximo [P(io) F(elici) Inv(icto) Aug(usto)]
 et Fl(avio) Jul(io) Constantio et Fl(avio) Cl(audio)
 Constanti[no] victorib(us) semp(er)
 [A]ug(ustis)

[A]b Antiochia

Pontif(ici) Max(imo), trib(uniciae) pot(estatis) XIII,
 Co(n)s(uli) III, p(ro) P(raetore). Mi(lia) p(assuum) (quinque).

We are not without proof that the people of this region of country were ignorant both of the number and the names of their rulers ; see Mommsen's remarks in the *Ephemeris Epigraphica*, 1884, p. 594, No. 1403. This ignorance is shown in our inscription by the omission of the name of Flavius Julius Constans, and by the fact that the DDNN claims that there were only two emperors.

No. 3.

[Imp(eratori) Caes(ari) C. Val(erio) Diocletiano
 P(io) F(elici) Invict(o) Aug(usto) et] Imp(eratori)
 C(aesari) M. Aur(elio) Val(erio) Maximiano [P(io)]
 F(elici) Invict(o) Aug(usto) [et Fl(avio) Val(erio)
 Constantio et Gal(erio) Val(erio) Maximiano
 no]b[ilissimis] Caesarib(us).

No. 4.

The reading of No. 4 is curious, but it is certain, and is vouched for by the impression. Lines 3, 4, 5 seem to show that the inscription is a repetition of No. 2, inasmuch as the name must be M. Aur. Val. Maximianus. But while we should look for the name of Diocletianus in line 2, we find only strange letters. It may even be that No. 4 contains fragments of two inscriptions.

The stone is at least seven miles out of place.

Man Agha is situated in a deep Dere. Henceforward our road crosses a succession of low spurs that run off from Sultan Dagħ. Between each of these spurs there is a narrow valley, each with its village and stream of water.

No. 182.

*Örkenez. Copied by J. H. Haynes.*¹

¹ In line 5 ΝΗ are in ligature. In line 11 end the C is written above the O.

Continuing our march towards Yalowadj we passed Kuyudjak, where we copied No. 105, and Gemen, where we copied Nos. 107 and 116. These inscriptions belong properly to Yalowadj, and for that reason they have been placed among the inscriptions of that place.

June 26. Yalowadj to Man Agha, 4 h. 15 m.

June 27. Man Agha, *via* Tcharük Serai and Kara Aghatch, to Beikieui, 3 h. 11 m. At Kara Aghatch the following inscriptions were copied.

No. 183.

Kara Aghatch. Epistyle block ornamented with an eggstaff in the door of the Khan. Length, 1.72 m. The inscription occupies the whole length of the block, and was continued on other blocks to the right and left of this one. Copy.

ΤΗΛΕΜΑΧΟΕΡΜΟΓΕΝΟΥCTΟΥΤΟΥΛΟΥΡΑCΕΩC
ΤΥΛΟΙCΕΚΤΩΝΙΔΙΩΝΔΙΟCΚΟΡΟΙCΘΕΟΙCΕΠΗΚΟ

. . . Τηλέμαχος Ἑρμογένους (του) Τολουράσεως . . .

. . . στήλῳ ἐκ τῶν ἰδίων Διοσκόρου θεοῖς ἐπηκόοις . . .

The names Τηλέμαχος, Ἑρμογένης, and Τολουράσις seem to have been common in this region, *e.g.* see *Papers of the American School*, Vol. III. Nos. 323, 328, 329. In the last (No. 329) a sister of Τηλέμαχος seems to be mentioned: Βαβίς Ἑρμογέους Τολουράσεως. This last is a queer name, and yet we have analogical formations from this very region. Thus in the *Papers of the American School*, Vol. III. No. 328, we find Τουλάρδος, and in No. 330 Τουραμμάς, while in No. 323 we read Τολουράσις, which is probably a mistake on the part of the stonemason for Τολουράσις.

No. 184.

Kara Aghatch. Large stone partly buried in the foundation of a Minare. Owing to the opposition of the natives I could not unearth it. Copy.

Ι Ο C K Ε C Ε Μ Ο Ν Τ Ο Κ Α Κ Ο Ν Ο Λ

June 28. Derekieui to Munafer, 5 h. 11 m. Shortly after passing Tchaltü we enter the pass between Kizil Dagħ and the outliers of Sultan Dagħ, reaching the watershed in 1 h. 14 m. Leaving Felle (see *Papers of the American School*, Vol. III. pp. 192-193) to our right, we reach the ruins called Monastir in 2 h. 30 m. from Beikieui. Monastir is situated at the northern limit of the plain of Kirili Kassaba; the ruins are unimportant. Here Mr. Ramsay locates Misthia (see *American Journal of Archaeology*, I. p. 146). Near the site there is a mound, which may have served as an Acropolis. It has every appearance of an artificial mound. Leaving Monastir we traverse the plain, reaching Kirili Cassaba in 56 m.

No. 187.

The name Οὐαλέντιλλα occurs in an inscription of Antiochia Pisidia above, No. 138.

Kirili Kassaba is a small market town, as the name indicates. It is very malarious during the summer and early fall. Leaving Kirili Kassaba we traverse a rolling country, passing Tchukurkend and Yenidje, and reaching Munafer in 1 h. 45 m. Munafer is a wretched village situated on the edge of a swamp, and like all the villages near the lake it is very unhealthy. On the contrary, the numerous and prosperous villages on the high ground along the northeastern edge of the plain of Kirili Kassaba are not malarious.

June 30. Munafer, *via* Eflatun Puñar, to Yonüslar, 7 h. 15 m. We visit Eflatun Puñar in order to secure photographs of the important monument. One of these photographs has been published by Dr. William Hayes Ward in the *American Journal of Archaeology*, Vol. II. (1886) pp. 47-51 and Plate I. Professor Kiepert thinks that the name of the place is Eflatun, not Elflatun. Eflatun is the Arabo-Turkish pronunciation of Platon, a name which cannot have the Arabic article *el*.

Leaving Eflatun Puñar we pass Selki, immediately beyond which place we ascend to a table-land. As we advance, this plateau gradually becomes rolling and barren. The few inscriptions of Yonüslar are given in the *Papers of the American School*, Vol. III. Nos. 313-315.

July 1. Yonüslar to Kizil Ören, 3 h. 18 m. The road leads up the Bagharzik Dere, of old infested by brigands, the terror of the caravans between Isparta-Yalowadj and Konia. The mountains on either side are low, but rough and jagged, and abounding in secure hiding-places for robbers. In 2 h. 5 m. the plain of Kizil Ören is reached. Nearly an hour west of Kizil Ören are the remains of a Seldjuk Khan and Djami.

No. 190.

Kizil Ören. On an epistyle block in the cemetery. Letters very faint and blurred. Copy.

βοήθη]η Κ(ύρι)ε τὸν δούλον τοῦ θε(ου) Θεόδορον
Κ(ύρι)ε βοήθη τὸν δούλόν σου Λεοντένα

July 2. Kizil Ören to Konia, 6 h. 20 m. The road is uninhabited and monotonous, lying mostly in ravines and defiles. In 1 h. 5 m. from Kizil Ören we pass the ruins of a Seldjuk Khan. In 2 h. 30 m. from this Khan we reach another and better preserved Khan, situated in a little valley just at the point where our road unites with the horse road from Ak Shehir to Konia. This succession of Seldjuk Khans — first between Egherdir and

Gelendos, then near Kizil Ören, and finally the two between Kizil Ören and Konia—shows that we have traversed the great commercial road between the Seldjuk Konia and the seaboard. Leaving this Khan we cross a mountain, and in 1 h. 46 m. we reach the western limit of the great plain of Konia.

No. 191.

Konia (Iconium). Slab now forming the Musalla Tashii in the southern cemetery. My copy.

Notwithstanding her name it is clear that Heraclia did not speak Greek as her mother tongue. Σὺν with the genitive is interesting enough in itself, but barbarism can go no farther than to give σὺν the genitive, dative, and nominative all at the same time.

We spent two days in Konia copying inscriptions and taking photographs of the Seldjuk city. The people of this eastern country seem to have had little interest in the affairs of this world, and spent their surplus energy in preparing tombs and epitaphs for themselves; witness the above inscriptions. When Leake passed through Konia, the walls of the city were full of inscriptions, which he had no time to copy. After the destruction of Konia by the Egyptians, under Ibrahim Pasha in 1833, these walls were used as quarries for the modern city of Konia. The inscriptions seen by Leake have all perished in this way before an epigraphist was found to copy them. But many inscriptions are no doubt still in the walls that remain, with the inscribed side hidden from view. Part of the wall had been thrown down only a short time previous to our visit, and I copied several inscriptions that had been brought to light in this way. These walls, though most probably of Seldjuk origin, were built in the common Greek fashion (Thuc. I. 93); that is, two walls were built at a fixed distance apart, and the space between them was filled with earth and stone débris. At Konia the filling consisted mostly of simple clay or mud, which took faithful impressions of the stones composing the outer shell of the wall, so that one may now see therein neat reliefs of inscriptions, Phrygian doors, and architectural fragments. The ruins of the buildings erected by the early Seldjuk Sultans of Konia speak in elegant terms of former splendor.

The Governor of the Vilayet of Konia, Saïd Pasha, who studied in England and speaks English fluently, showed us kind attentions in more ways than one. He is collecting the most important antiquities of the district, as they come to light, for the Imperial Museum in Constantinople, and the collection is not without interest. Among other things may be mentioned a frieze in very high relief. Unfortunately we were unable to get photographs of the collection.

July 5. Konia to Obruk, 9 h. 47 m. The road from Konia to Ak Serai, the ancient Archelaïs, crosses the desert region. The plain, up to the pass in Boz Dagħ, is absolutely level, and the thirsty traveler is mocked on all sides by the *Fata Morgana*, promising water near at hand; but the promised water recedes continually, and finally turns out to be nothing but a deceptive mirage. We did not think it necessary to water our horses at Zeïvedjik, and consequently they had to make the whole long journey to Obruk thirsting.

The well bears the name : "*well with the ninety-nine steps.*" The steps leading down to the water are still in situ ; the water is brackish. At the ruined and deserted Dibidelik Khan there is a great well, both with a vertical well-shaft, and with a tunnel leading down to the water at an angle of about 30°. The water cannot be drunk by man or beast. This point is the limit of the waterless and hence desert plain of Konia.

At Obruk there is a little lake, the surface of which is about ninety feet below the surrounding country. The villagers use the water of this lake for household purposes. We were told that the water is drinkable at all seasons of the year, except for two weeks in December, when it is in a state of violent ebullition. When this season approaches, the villagers lay in a supply of water sufficient to last until the lake has resumed its wonted calm. How true this may be, or what causes the ebullition of the water, I am not prepared to say.

July 6. Obruk to Sultan Khan, 7 h. 31 m. The country is not a level plain, but is gently rolling ground. The land would everywhere be productive if it could only be irrigated. Unfortunately, water can be had only at intervals, for instance, at the villages Ortakuyu, Bakharakh, Erdodu. These villages raise crops that can do with the winter and spring rains, such as wheat and barley, but they rely mainly on their herds for subsistence.

Sultan Khan is the grandest and most beautiful of all the remains of Seldjuk splendor seen by us in Asia Minor. We spent one day in its welcome shade, during which time numerous photographs were taken, and the huge building was roughly measured. One of the Arabic inscriptions says that it was built in 1277 A.D. A very large spring rises near Sultan Khan, and the land yields abundant harvests wherever it can be properly irrigated. Indeed, this is true almost everywhere in Asia Minor.

July 8. Sultan Khan to Ak Serai, 7 h. 53 m. We pass the ruins of a Seldjuk Khan in 4 h. 15 m. from Sultan Khan. Ak Serai is a sleepy uninteresting town, with but few traces of the Graeco-Roman civilization ; but the foot-prints of the Seldjuks are abundant.

Henceforth the reader may consult the map of Southern Cappadocia, which accompanies this volume.

Ak Serai. Copy.

P R O V

July 9. Ak Serai to Selme, 4 h. 4 m. At Selme we found numerous dwellings cut in the rock, similar to those described by the early travellers at Soghanlı Dere and Udjessar. In fact, we found such rock-cut dwellings wherever the soft volcanic tufa appears (Hamilton, *Researches*, I. p. 97). Selme is situated in a deep gorge, through which the Irmak flows, and in which, in fact, it has its source. The cliff to the east rises perpendicularly to a height of from four to five hundred feet; at its base there is a maze of sharp natural cones, similar to those in the region around Udjessar. Most of these cones have been excavated for human dwellings, often with several stories. These excavations are used as dwellings now, as in ancient times. The whole cliff is honey-combed into dwellings, chambers, chapels, passages, and tombs; story rising upon story. Here and there may be seen small temple façades on the exterior of the cliffs, especially at Ikhlara. These façades resemble those in the region of the tomb of Midas. People still live and die in these rock-cut dwellings, at least two hundred feet high on the cliff. There is no earthly reason why they should live there, as the country is safe and land abundant; but they do not seem to object to the dark winding stairs and passages.

Across the Irmak, five or ten minutes south of Selme, is the village of Ikhlara, the cliff behind which is also similarly honey-combed into dwellings. Conspicuous on the exterior of the cliff are temple façades, which were doubtless intended for tombs. A short distance east of Ikhlara the Irmak gushes out at the foot of the cliffs, a full-grown river at its source.

July 10. Selme to Kuyulu Tatlar, 4 h. 49 m. Leaving Selme we immediately ascend the bluff, and henceforward traverse an open country. The old map of this region, founded on von Moltke's flying ride, and the new sketch founded on the travels of Vrontchenko and Tchihatcheff, are all wrong. The map accompanying this volume will be found to be more accurate, it is hoped.

July 11. Kuyulu Tatlar to Ortakieui, 5 h. 34 m. Kuyulu Tatlar is so called from twelve or fifteen wells, all in a cluster. From them the village is supplied with water. This region, though blank on the old map, has numerous villages. It may be noted that the Tada Su of the old map does not exist, at least not in the plain of Kuyulu Tatlar and Malagob; and, furthermore, the drain-water from this district must run south, and not north, as on the old map. Malagob is a large and flourishing village, whose inhabitants are in the main Greek-speaking Greeks. The Greeks are numerous all through the western part of Cappadocia. As a general rule they cling to their language with great tenacity, a fact worthy of notice, inasmuch as the Greeks in other parts of Asia Minor speak only Turkish. Their dialect has been treated by *Καρολίδης* in the *Μουσείον καὶ Βιβλιοθήκη τῆς Ευαγγελικῆς Σχολῆς*, published in Smyrna. Instances of Greek-speaking towns or villages are Nigde, Gelvere, Malagob, and Ortakieui, in what is commonly but wrongly called Soghanlü Dere. Leaving Malagob we shortly ascend a hill, which turns out to be the rim or bluff of an elevated plateau, extending east as far as Develü Kara Hissar. Soghanlü Dere, Ortakieui Dere, and what other Deres there may be, are mere breaks in this plateau, and the top of the bluffs of all the Deres correspond with the general level of the surrounding plateau. The descent down into Ortakieui Dere is made by an artificial road that has been excavated out of the soft tufa.

July 12. Ortakieui to Develü Kara Hissar. We got lost between Ortakieui and Soghanlü Dere, and the exact time cannot be given. The time between Balak and Develü Kara Hissar is 1 h. 50 m.

The wonders of Soghanlü Dere have been described by Hamilton. The rock-cut dwellings are more numerous, but of the same character as those at Selme and Ikhlara; only at Soghanlü Dere there are no temple façades to be seen. At Bashkieui the Ortakieui Dere is about one hundred yards wide; but the width increases steadily, reaching a width of from five to seven hundred yards at the point where Soghanlü Dere branches off laterally from it. While the surrounding plateau is a barren waste, the soil in the Deres is exceedingly fertile, delighting the eye with its luxuriant gardens. This is especially the case at Ortakieui. Whether these rock-cut habitations date originally from an earlier epoch or not, it is at all events certain that they were used by the early Christians. But such habitation goes back to a period

so remote that the Christian Greeks of Ortakieui have no traditions concerning it. Chapels are numerous, in some of which may still be seen pictures of Byzantine Saints, with inscriptions just like those common in orthodox churches of to-day. Among the Saints depicted are Σέργιος, Βάχος, Μερκούριος (see Nos. 258 and 261). In the floor of the chapels graves were cut, in some of which we found human skeletons. Indeed, such tombs are frequent in the dwellings themselves, so that, as Hamilton remarks, the people lived in the same room with their pigeons and their dead. Innumerable pigeons live in the rock-cut dwellings both of Soghanlū Dere and Udjessar. At the latter place the villagers pay great attention to them and use them for food.

Ἀ(γίου) Μερκουρίου.

Zengibar Kalesi is situated about half an hour west of Develü Kara Hissar. It is a lofty rock with two peaks, one of which is considerably higher than the other. In the saddle between the two peaks nestles Kalekieui. There can scarcely be a doubt but that the higher peak of Zengibar Kalesi is Nova, the proud rock where Eumenes and his little band defied the whole army of Antigonos for nearly a year.

July 14. Develü Kara Hissar to Indjesu, 4 h. 53 m. We traverse the new road. The country is desolate. We suffered much from the intense cold, in spite of the fact that to-day is July 14th.

July 15. Indjesu, *via* Kaisariye, to Talas, 6 h. 29 m. We cross the southern end of the great Sazlik, or *place of the bulrushes*, fixing its coast line.

July 16. Talas to Ispile, 1 h. 20 m. Parting with regret from our kind friends, the American missionaries of Caesarea, we hurried on to the region east of the Antitaurus.

July 17. Ispile to Yokara Suvergen, on the eastern bank of the Zamantia Tchai, 6 h. 59 m. The country northwest of Tomarza is uninteresting and barren, except in the Deres, in which all the villages are situated. Tomarza is a large Armenian town, with considerable traces of ancient remains, most probably Armenian. At Sheikh Barakh we reached the Zamantia Tchai, which is spanned by a bridge at this point. We forded the river opposite Ashagha Suvergen; it is deep and rapid.

July 18. Yokara Suvergen to Ak Puñar, 7 h. 37 m. We crossed the Antitaurus by the precipitous pass between Dede Dagħ and Bei Dagħ. The region east of the Antitaurus was hitherto unknown; we found it fertile and well-populated. The inhabitants are Avshars and Circassians. These Circassians are refugees from Circassian Russia, and were assigned homes here by the Turkish government. Here, as everywhere, they have the reputation of being great cut-throats and robbers, but we were treated with the most distinguished consideration and kindness by them. Afterwards we visited numerous Circassian villages, and we have the same good report to give of them everywhere. I am told, however, that this was due to the fact that my chief servant was a Circassian. It is always pleasant to enter a Circassian village, for everywhere one sees order, thrift, and cleanliness, a refreshing treat after a prolonged sojourn in the wretched hovels of the Turkish peasantry.

July 19. Ak Puñar to Shahr, 3 h. 20 m. In 2 h. 25 m. the plain closes in to a wild and rugged gorge. The river Seihûn, the ancient Sarus, has cut its way through the mountains in many curves, each curve corresponding to a projecting spur of the mountain. Shahr, the ancient Comana, is the only place marked on Tchihatcheff's map south of Olakaya. The great goddess Ma is no longer worshipped at Comana; but, to our great astonishment, we found a Protestant church there, composed of the converts of the American missionaries. We spent a day here copying inscriptions. We also ascended Kûlek Dagħ, on the summit of which we found a large and impregnable fortress of great antiquity, antedating the Roman conquest, most probably.

The ruins of Comana are by no means extensive. Chief among them are the temple, the ruins of the theatre, and a highly ornamental portal.

Comana was once so rich in temples and brilliant edifices that it bore the name of the "Golden." Even in the time of the first crusaders it was *pulcherrima* and *opima*. For the line of march of the first crusade, see Ritter, *Klein-Asien*, II. p. 265-272.

July 21. Shahr to Hadjin, 8 h. 12 m. We turn our faces toward the south. This day was rich in topographical results, and the map of Tchihatcheff was found to be wrong in almost every particular; see the map accompanying this volume. Hadjin is on the right, not on the left side of the Seihûn, as is the case on Tchihatcheff's map. Hadjin is a modern town, inhabited solely by Armenians. It is in a great hole in the mountains, many hundred feet below the level of the surrounding country. Every available spot is occupied by a house, and we could not even find a place large enough for our camp. Hadjin is a seat of the American missionaries, whose hospitality we enjoyed during our stay, and whom we left with many regrets.

July 22. Hadjin to a point west of Kilissedjik, 7 h. 6 m. We ascend from Hadjin to the plateau in 1 h. 10 m., and in 3 h. 17 m. from Hadjin we reach the bluff of the great cañon of the Seihûn (Sarus). The cañon is fully one thousand feet deep. The bluffs are almost perpendicular, so that, as one stands on the edge and looks down, it seems scarcely possible for a living being to descend and ascend; yet it may be done. The descent from the top of the bluff to the river bed occupied 37 m. The ascent of the eastern bluff occupied 41 m. Leaving the eastern bluff we travel for 2 h. 35 m. in the direction of Kilissedjik, which point we had hoped to reach, but finding ourselves hopelessly lost, and night having set in, we encamped.

July 23. From our camp 1 h. 59 m. west of Kilissedjik to Göksün, 5 h. 8 m. Kilissedjik is simply an Avshar Yaila. We found here two tombs of the Graeco-Roman period. The country east of the Seihûn is wooded until within a short distance of the plain of Göksün.

I.

ROMAN MILLIARIA AT COCUSSUS.

The Roman millaria given below are about eight feet high and three feet in diameter at the base, tapering off to a very thick, blunt point at the top. They are accordingly cone-like in shape. The stones are all very rough and unpolished, and the surface is full of elevations and indentations. It is obvious that inscriptions on such a rugged, uneven surface are very difficult to read, and that, without some practical experience in field epigraphy, one would stand before them absolutely helpless. Impressions of such inscriptions are altogether worthless, as trial has proved to me conclusively.

No. 269.

A mate to this inscription was copied by Mr. Ramsay about six miles to the northeast of Comana, and was published by Mr. Waddington in the *Bulletin de Correspondance Hellénique*, 1883, p. 144, from which it was transferred to *Ephemeris Epigraphica*, 1884, p. 37, No. 77. Mr. Waddington suggests that the fragmentary condition of these inscriptions is probably due to the shortness of the reign of the emperors Pupienus and Balbinus, which, lasting only three months, was no doubt already a thing of the past before the repairs of the roads were completed by the legate Severus. It seems clear that Severus had already caused the inscriptions of Pupienus and Balbinus Augusti and Gordianus Caesar to be engraved on the stones when the news of the deaths of the emperors reached him. Then before putting the milestones in place he caused the names of Pupienus and Balbinus to be erased [not because the names of the emperors had been abolished, but solely for the sake of historical accuracy], changing RESTITVERVNT to RESTITVIT, but leaving to Gordianus III. the title of *Nobilissimus Caesar*, notwithstanding the fact that he was now emperor. Professor Mommsen, in *Ephemeris Epigraphica*, 1884, p. 37, No. 77, calls attention to the erasure of the names of these two emperors in Britain in *C.I.L.* VII. 510: *Deleta autem sunt omnino non iussu Gordiani, sed errore provincialium longe a turbis illis remotum.*

Mr. Waddington points out further that after the death of Maximinus a certain *Cuspidius Celerinus* proposed to the senate to confer the imperial purple upon Pupienus and Balbinus (Capitolinus, *vita Maximini*, 26). It is not improbable, therefore, that our legate, Cuspidius Flaminus Severus, was a son or other family connection of *Cuspidius Celerinus*, and that the province of Cappadocia was bestowed upon him in return for the services rendered by his father.

At a later date the inscription of Diocletian-Maximian-Constantius-Galerius was incised in the place made vacant by the erasure of the names and titles of Pupienus and Balbinus. Only a fragment of this inscription now remains, but it is sufficient to enable one to restore it with certainty.

This is the one hundred and forty-first milestone.

This stone has two inscriptions, the one engraved on top of the other. The *restitutores* of roads and bridges during the reign of Diocletian-Maximian under *C. Julius Flaccus Aelianus* made use of the old *Milliaria*, and caused inscriptions of Diocletian-Maximian to be engraved on them without any regard for the already existing inscriptions. Thus, as in this inscription and in others below, two or even three inscriptions are found so mixed up that it requires both patience and ingenuity to disentangle them.

To inscription *A* belong lines 1-3 and 8-15 inclusive, as well as the ET at the beginning of line 7. After this ET there followed in the original inscription of the Maximini the name of *C. Julius Verus*

Maximinus, the younger, which was afterwards erased. The *restitutores* of Diocletian-Maximian utilized the space thus made vacant for their own purposes, inserting INVICTO, etc.

Inscription *A* originally read as follows :

Imp(erator)
 Caesar C. Jul(ius)
 Verus Maximinu[s]
 [Pius Felix Aug(ustus)
 trib(uniciae) pot(estatis) (V?)]
 et [C. Jul(ius) Verus Maximinus]
 nobilissimus Caesar
 vias et pontes vetu-
 [s]tate conlabsas res-
 titueru[n]t per [Licinium
 Serenianum] leg(atum)
 Aug(ustorum) pr(o) pr(aetore).

The AVR in line 4 is not sufficient to authorize a restoration. It seems probable, however, that the inscription is that of an emperor other than those mentioned in known millaria of Cataonia or Melitene.

The last letters PKE look like numerals [125], but the matter is not certain, because the letters are too small and in the wrong place, if one may judge by the analogy of all the other numbered millaria of Cataonia.

Καπίτων Τιλ-
λεὺς ἐκ τῶν ἰδιῶ-
ν ἀνέθηκεν.

The name Τιλλεὺς occurs in an inscription of Comana published in the *Bulletin de Correspondance Hellénique*, 1883, p. 137, where it is compared with Τιλλιβόρας, the brigand (Lucian, *Alexandr.* 2).

This inscription was erected in the ninth year of Trajan. It informs us that Zeus Epikarpios was worshipped here ; indeed, in so fertile a plain, we should naturally expect to meet with the cult of some god of the harvest.

In 2 h. 47 m. from Tasholuk we regain Göksün, and pass on, going up the valley of the Tölbüzek Su, and reaching Mehemet Beikieui in 1 h. 22 m. from Göksün.

II.

MILLIARIA ON THE ROMAN ROAD FROM COMANA TO COCUSSUS.

On this excursion from Göksün to Yalak, which is only six miles from Shahr, we found a number of millaria, and thus were enabled to trace the Roman road from Comana to Cocussus in its entire length.

Nos. 288-289.

 10 mium Hieronem
 [l]eg(atum) Aug(ustorum) pr(o)
 pr(aetore).

The RA at the beginning of line 9 is problematic.

The name of this legate, Antonius Memmius Hiero, is now known with accuracy from this inscription. It occurred, indeed, in an inscription published in the *Bulletin de Correspondance Hellénique*, 1883, p. 142, No. 30, whence it was inserted in the *Ephemeris Epigraphica*, 1884, p. 38, No. 79, but it was in so fragmentary a condition that it had to be restored by conjecture.

From the ONEM of that inscription Mr. Waddington conjectured [*Seneci*]onem, and suggests that the same name must be restored in an inscription of Tavium, published in the *Bulletin de Correspondance Hellénique*, 1883, p. 26. This inscription was also copied by me. But certainly *Hieronem* must now be read instead of *Senecionem*, and in case the two inscriptions make mention of one and the same person, as seems likely, then his full name is M. Antonius Memmius Hiero.

¹ The vacant places in line 4 were never incised. In line 6, NH are in ligature.

The *Antonine Itinerary* for the whole Antitauran region seems to be hopelessly confused, and its inconsistencies will perhaps never be satisfactorily explained. On p. 210 we read : —

A Coduzalaba	
Comana	XXVI
Siricis	XXIII

while on page 211 we have the following :—

Item a Caesarea Anazarbo	CCXI., sic :
Arasaxa	XXIII
Coduzalaba	XXIII
Comana	XXIII
Siricis	XVI
Cocuso	XXV

Now the millaria given above show that the Roman road between Comana and Cocussus went, as one would naturally expect, by Yalak, Kürdkieui, and Mehemet Beikieui ; and as the whole distance between Shahr and Göksün is reckoned as eight hours, there is plainly something wrong in the statements of the *Antonine Itinerary*. Both Yalak and Kürdkieui are sites of small ancient towns ; but the most important of these was at Yalak, and at Yalak I am inclined to place Siricae. In that case the *Antonine Itinerary* would be nearer the truth if it were emended to read : —

Comana	XXIII
Siricis	VI
Cocuso	XV

Let it be noted that this, besides being a direct route, is the only natural road-bed between Comana and Cocussus : on the northeast lies the Bin Bogha Dagħ, and on the southwest the Yuvadja Dagħ. It is wholly unreasonable to suppose that the Romans would neglect the only natural road-bed to carry a road over the huge mountains just mentioned.

July 26. Yalak to Mehemet Beikieui, 3 h. 35 m. We return in the direction of Göksün.

July 27. Mehemet Beikieui, *via* Kotchos, to Göksün, 4 h. 37 m. We traced the Tölbüzek Su to its source, which is about three-quarters of an hour west of Mehemet Beikieui, at the foot of Yuvadja Dagħ. Here innumerable springs gush from the mountain side, and the water from them is sufficient to form a large swift river of the purest, coldest water.

No. 299.

Kotchos. On the slope of Yuvadja Dagħ, in a cemetery near a Yaïla, about two hours from Mehemet Beikieui. A pine-tree has grown around the stone, the beginning of the inscription being buried in the tree. Copy.

At first sight the difficulties of this inscription seem to be insurmountable, but they disappear by the help of the elucidations given

above under No. 271. The original inscription was that of Pupienus and Balbinus Augusti and Gordianus Caesar, the close of which is found in lines 8-12 inclusive, and which read originally as follows :

A.

[Imp. Caes. M. Clodius Pupienus
 Maximus et Imp. Caesar
 D. Caelius Calvinus
 Balbinus Pii Felices Augusti
 et M. Antonius Gordianus
 nobilissimus Caesar]
 restit[uerunt]
 per C[u]spidium [Fla-]
 minium Severum [le-]
 [g]atum p(r)o pr[ae]-
 to[re].

Then after the erasure of the names of Pupienus and Balbinus a new inscription of Gordianus III., couched in terms different from those of the original inscription, was incised in the place made vacant by the erasure. As in Nos. 271, 316 the closing lines of the first inscription were allowed to stand, notwithstanding the fact that they were out of place both grammatically and historically. The remnants of this inscription are to be sought in lines 3, 5-7 inclusive, and must be restored somewhat as follows :

B.

[I]mper[atori] Caesari Mar-]
 c[o A]nto[nio]
 Gor[dian]o [Pio Fe-]
 lici Augu[s]to.

Lastly, line 4 is almost certainly to be restored as

GALVALMAXIMIANO

and consequently we have before us an inscription of Diocletian-Maximian-Constantius-Galerius Maximianus. To this inscription belong lines 1-2, 4, and the latter part of line 6. It must be restored as follows :

C.

[Impp. Caess. Diocletiano
 et M. Aur. Val. Maximiano P(iis) F(elicibus)
 Inui(ctis) Aug(ustis) et Fl. Val. Constantio et]
 Gal. Val. Maximiano
 nob(ilissimis) Caes(aribus).

In this cemetery there is still a fourth milliarium, deeply imbedded.

In a cemetery 1 h. 5 m. east of Göksün there are two more millaria; one nearly buried, the other erect but illegible. It was impossible for us to get at half-buried stones that were distant from a village: to raise one out of a hole is generally the work of half a day for four men in a country where levers are not to be had.

No. 305.

In an old cemetery by the roadside, one hour and forty minutes to the eastward of Göksün. See Preliminary Report, p. 28, No. 29. Copy.

P E R M E M M

If the name of the legate was Antonius Memmius Hiero, then the inscription stood in the name of the Philippi.

No. 306.

Ibidem. Erect. See Preliminary Report, p. 28, No. 30. Copy.

This is the one hundred and twenty-second milestone from Melitene.

In the cemetery by the roadside 20 m. southeast of Kanlı Kavak we found no less than twenty-six milliarium, many of which were never inscribed. The inscribed stones cost us a day and a half of hard work in deciphering and copying the inscriptions.

NO. 310.

Kanlı Kavak. Milliarium in the old cemetery which is on the main road leading from Göksün to Yarpuz, and about twenty minutes to the southeastward of Kanlı Kavak. See Preliminary Report, p. 29, No. 34. Copy.

In the light of Nos. 271, 304, this inscription becomes plain, and falls into two inscriptions. The name of the legate Cuspidius Flaminus Severus fortunately is preserved here in full, and from it we learn that the original inscription was one of Pupienus and Balbinus Augusti and Gordianus Caesar. What is now left of it is contained in the lines 6-11 inclusive, with exception of the TO at the beginning of line 6, which belongs to the second inscription. The original inscription read as follows :

A.

[Imp(erator) Caesar M.
Clodius Pupienus Maximus
et Imp. Caes. D. Caelius
Calvinus Balbinus
Pii Felic(es) Aug(usti) et
M. Antonius Gordianus
nob(ilissimus) Caes(ar)]
restituere-
nt per Cuspid-
ium F(l)amini-
um Severum
legatum prop-
[ra]etorem.

After the erasure of the names of Pupienus and Balbinus the new inscription of Gordianus III. Augustus was incised, and is preserved intact in lines 1-5 inclusive, to which must be added the TO at the beginning of line 6. It reads :

B.

Imp(eratori)
Caesari Ma-
rco [A]ntoni-
o Gordiano Pi-
o Felici Augus-
to.

No. 317.

Kanlı Kavak. Two inscriptions are so inscribed on and over each other that it is perhaps impossible to disentangle them, but the lines given below can be read. See Preliminary Report, p. 31, No. 40. Copy.

I have a note to the effect that lines 8, 9, 10 of *A* are written together, and are so mixed up as to be exceedingly doubtful.

By some mistake, which I am unable to explain, line 11 of inscription *A* does not appear in the *Preliminary Report*.

It must be noted especially that lines 9 and 11 of inscription *A* certainly belong to inscription *B*, which see below.

The two inscriptions are badly confused on the stone, inasmuch as the later inscription of Diocletian-Maximian-Constantius-Galerius Maximian (*B*) has been incised over the older inscription of L.

Septimius Severus (*A*) in such fashion as to make the whole unintelligible at the first glance. It is impossible to present the inscriptions accurately in uncial text, but I have tried to give at least an approximate idea of the truth.

Let us endeavor to disentangle the inscriptions !

Lines 1 and 2 belong wholly to *B*. Of line 3 IMPCAES belongs to *A*, and MAVRVAL to *B*. Besides this a T was inserted after the E of CAES, and the ET thus obtained belongs to *B*.

MAXIMIANO was inserted between lines 3 and 4, and belongs to *B*. All of line 4 belongs to *A* excepting the closing AVG, which belongs to *B*, and follows the PP[F]E~~///~~INV which is inserted between lines 4 and 5. In this line the A of AVG has been so carved as to resemble a ligature with the closing S of SEVERVS.

Lines 5, 6, 7 belong wholly to *A*, only perhaps at the close of line 6 a disturbing effect has been produced by the incision of something belonging to *B*. The letters between lines 6-7 and 7-8 belong to *B*. The NO at the close of line 8 probably originally followed the name of P. Septimius Geta in line 9, that being the only theory upon which I can account for its presence, which is certified by the impression.

Lines 9, 10 belong to *A*, with the exception of the NObbCAESS in the middle of line 9, which belongs to *B*, and was incised in the place made vacant by the erasure of the name of Geta.

After these preliminary explanations it will be clear that the inscriptions must be restored to read as follows :

A.

Imp(erator) Caes(ar)

L. Septimius Severus

Pius Pertinax Aug(ustus), Arab(icus), Adiab(enicus),

Parth(icus) Max(imus), Pont(ifex) Max(imus), trib(uniciae),

NO. 328.

Kanlū Kavak. A quadrangular cippus in the cemetery has a defaced inscription, of which only ΓΛΥΚΥΤΑΤΩ is to be deciphered.

July 30. Kanlū Kavak, *via* Aristülū and Kizildjik, to Kayadibi, 6 h. 37 m. Between Kanlū Kavak and Yarpuz no milliaria were found. Indeed, all seem to have been transported from this whole region to the cemetery of Kanlū Kavak to serve as tombstones. The road of to-day traverses a rough and inhospitable country, but at Kayadibi the plain is again reached.

July 31. Kayadibi, *via* Nadin and Altash, to Yarpuz, 6 h. 56 m. The Göksün Su was crossed twice to-day; it is a large stream here. Leaving Ertchin we cross the low Atlas Dagh to Yarpuz.

No. 329.

Yarpuz (Arabissus). In the cemetery. So superscribed as to be hopelessly illegible. See Preliminary Report, p. 35, No. 50. Copy.

The name of the legate is probably C. Julius Flaccus Aelianus, and consequently the inscription belongs to Septimius Severus. Still the data are too insignificant to make this certain.

All the other milestones copied by me have Greek numerals. This one alone having the Latin C, it being the one hundredth milestone from Melitene.

No. 338.

Inscribed on a panel smoothed out on the face of the rock on the mountain side, south of and immediately above the cemetery mentioned in connection with the last inscription. There is no means of telling how much of the panel has been broken away.

At Yalak the one hundred and forty-fourth milliarium (No. 297) was found. By a glance at the numerals of the milliaria between Yalak and Yarpuz it will be seen that the numerals diminish steadily along this road, a fact which proves conclusively that distances in the Trans-Antitauran region were measured from Melitene as the starting-point.

From Göksün the Göksün Su goes down a narrow valley, and does not flow south of Beirüt Dagħ, as it is made to do on the old map constructed from von Moltke's hurried ride.

August 1. We undertook a journey in a northerly direction, with Khurman Kalesi as an objective point. The time from Yarpuz, *via* Khunu and Norshun, to Indjiler was 4 h. 40 m.

NO. 339.

Arrived at Indjiler we find that we have lost the road to Khurman Kalesi, and are advised to take a short cut through the mountains. After wandering about in the uninhabited mountains until midnight we reluctantly camped out.

August 2. We left camp at peep of day, and for a wonder found Khurman Kalesi at 4 o'clock A.M. Not being able to find food for man or beast, we had to leave immediately for Tanir. The inscriptions, for which we had undertaken the journey, were found afterwards (Nos. 352-354). The time from Khurman Kalesi, *via* Tanir, Norshun, and Merki, to Yarpuz was six hours. Tanir is the site of an old town; no doubt the name is a corruption of ΠΤΑΝΔΑΡΙΞ.

A restoration cannot be attempted on the sole authority of line 2, and the inscription is probably that of an emperor not mentioned on any of the known milliaria of Cataonia.

I had been suffering from fever ever since our disastrous journey to Khurman Kalesi, and here the fever had reached such a pitch that I had to abandon work for to-day. The two milliaria in the cemetery of Isgin (Nos. 343-344) were copied by Mr. Haynes.

PNB

This inscription I did not see, as my line of march did not lie along the valley of the Sarus above Comana.

The new light thrown upon the history of Cataonia by my millaria makes it certain that this inscription must be divided into two, the restoration of both of which being beyond question. I venture to insert it here mainly in order to clear up the doubts and questions raised by Mr. Waddington in the *Bulletin* as cited above.

The original inscription (A), remnants of which are lines 4-10, stood in the name of the Philippi Augusti. Mr. Waddington points out that in case the inscription belongs to Diocletian and Maximian Augusti and Constantius and Maximian Caesares, as line 2 would seem to indicate, then the title *vir clarissimus legatus Augusti pro praetore* is historically inaccurate, inasmuch as from the times of Diocletian on the province was governed only by a *praeses* or *Consularis*. But my Nos. 290, 292, 294, 310, etc., make it perfectly clear that the stone held two inscriptions, the oldest of which, being in the name of the Philippi, might well enough give the governor the title *vir clarissimus legatus Augusti pro praetore*. From the same inscriptions it is clear that Mr. Waddington's conjecture of *Senecio* as the name of the legate is wrong, and that the name is Antonius Memmius Hiero.

The inscriptions read originally as follows :

Owing to my severe illness we were detained three days in Albistan, during which time kind attentions were showered upon us by Rev. and Mrs. Henry Marden, American missionaries of Marash.

Henceforward no millaria were found. I am wholly unable to account for this fact, as there are only two possible roads from Albistan to Melitene, one of which we traversed on the way out and the other on our return. It may be safely affirmed, however, that the Roman road did not go by way of Kōz Agha and Pulat, since this whole road is much too difficult. Had the Roman road gone this

way, it could not have avoided the abrupt pass of Ola Kaya, and it is exactly this pass that makes it necessary to look for it elsewhere. The only other route is that by way of Derinde, and thence down the Tokhma Su to Malatia (the ancient Melitene).

August 8. Albistan to Yenikieui, 5 h. 29 m. There is a badly defaced Hittite inscription in the cemetery of Küтчүк Yapalak. We traverse the great plain of Albistan. North of Böyük Yapalak we enter a narrow valley, which gradually ascends to the plateau on which Yenikieui is situated.

No. 350.

August 9. Yenikieui, *via* Arslan Tash, to Köz Agha, 6 h. 12 m. We visited Arslan Tash and got photographs of the lions, discovered by von Moltke. They once stood on either side of a gateway just as the Assyrian Cherubim did. The Wolfe Expedition to Babylonia discovered similar lions at Arslan Tash in the Serudj Ova, a day's journey southeast of Biredjik in Mesopotamia. These Mesopotamian lions are of much better workmanship, and besides are better preserved. But the two pairs of lions belong, no doubt, to the same epoch.

The road southeast of Böyük Yapalak traverses an open rolling country; it is barren, for the most part, there being no means of irrigating it.

August 11. Köz Agha to Pulat, 9 h. 11 m. A journey of great difficulty, especially east of the Soghud Su, where the ascent to the pass of Ola Kaya Dagħ begins. The country is very rough. The mountains are volcanic. The time from Köz Agha to the summit of the pass of Ola Kaya is 7 h. 35 m. The descent is very abrupt, and in places progress is almost impossible. In 1 h. 28 m. from the summit of the pass we reach the plain of Pulat.

August 12. Pulat to Kalaik, 8 h. 19 m. Thirty-nine minutes north of Pulat we reach the low watershed, and thenceforth go down a small arm of the Sultan Tchai, which we cross a short distance east of Tchutlu. The eastern bank of the Sultan Tchai is a great bluff, which is ascended in 21 m. We then find ourselves on a great elevated plateau, which is broken by the two rivers west of Kalaik. Kalaik is situated on the western bluff of the river, and about six hundred feet above the river. A very large canal of ice-cold water flows through Kalaik, and goes all the way to Malatia. It is this canal which furnishes the city of Malatia with its abundant supply of water. Besides this it irrigates the whole intervening country, which is a veritable garden spot. A great variety of fruit trees grow on every hand, and the fruit of Malatia is celebrated far and wide.

August 13. Kalaik to Malatia, 1 h. 46 m. We pass through the delightful forest of fruit trees that extend all the way to Malatia. Their cool refreshing shade is delightful to the traveller after a journey of weeks through a treeless country. The new city of Malatia is reckoned as the half-way station on the overland route from Constantinople to Baghdad. It is a wide-awake business town, and in this respect it differs very materially from the ordinary Turkish town. When the Egyptians were at war with the Sultan a large number of Turkish troops were quartered for an indefinite period on the people of old Malatia, which stood on the site of Melitene. This was more than the long-suffering inhabitants could bear; so they abandoned their old homes to the soldiers, and built a new city among the gardens seven or eight miles southwest of Melitene. After the war-troubles were over the people still clung to their new abodes.

August 14. Malatia, *via* Melitene, to the junction of the Tokhma Su with the Euphrates, opposite Sheikh Hassan, 3 h. 16 m., and return to Malatia. Melitene is now a mass of ruins; among them many fine specimens of the ornamented architecture of the Seldjuks are conspicuous. The whole country between Melitene and the Euphrates is exceedingly fertile.

August 15. Malatia to Sara Hadji, 8 h. 37 m. West of Arga we cross a mountain to Kürdkieui; then comes a wild gorge and a steep ascent to Sara Hadji on the mountain side. Here our whole party escaped being murdered only by a miracle, and man and beast hungered until the night of the following day.

August 16. Sara Hadji to Mühde, 8 h. 45 m. Leaving Sara Hadji we reach the summit of the mountain in 43 m. Then we descend to another Kürdkieui, situated in a wild gorge, then another great mountain is crossed, and finally the Tokhma Su is reached at Bel-i-Gedik. At this point the river flows through narrows for half a mile. A perpendicular wall of rock, three or four hundred feet high, is on either side of the river. Consequently the road has to climb the little mountain. Once across this mountain we go up the open valley of the Tokhma Su to Mühde, where we halt a day to recruit ourselves and horses after our long fast. The whole mountain country between Arga and the Tokhma Su is inhabited solely by Kurds, an inhospitable, murderous set of filthy villains, who still preserve all the ferocious characteristics of their ancestors, the ancient *Καρδοῦχοι*, of whom Xenophon has little good to report in the *Anabasis*.

August 18. Mühde, *via* Derinde, to Yenikieui, 6 h. 22 m. The valley between Mühde and Derinde is very fertile. An hour east of Old Derinde the valley contracts to a gorge, and New Derinde stretches out on both sides of the river for the whole distance between this point and the Derinde of the old map. Old Derinde was abandoned like Old Malatia, and for the same reason. It is now a grand mass of ruins. Derinde means "*in* or *at* the gorge." Professor Kiepert regards the name as a popular interpretation of the ancient name *Δελινδής*. At Old Derinde the river has cut its way through the solid rock, which rises perpendicularly to a height of three or four hundred feet on either side of the river. The width of the pass through which the river thus flows is about fifty feet. On the right bank is the almost impregnable castle, probably dating from the time of the early Turks; at the foot of the castle and west of it lies the abandoned town.

Ashta is also situated in a gorge. The top of the eastern bluff corresponds with the general level of the surrounding plateau. Up to this point the country is difficult and our progress slow. When 2 h. 13 m. out from Derinde we found a small lion in black basalt by the roadside. Photographs were taken, but it was just growing dark, and they did not succeed well. After leaving the lion a heavy thunderstorm overtook us; my men got separated into four parties, each of which got lost. It was about midnight when we were all together again at Yenikieui. It would have been a sad night for some of us, but for the generous exertions of our good Zaptieh Halil.

August 19. Yenikieui to Büyük Tatlar, 6 h. 49 m. We cross a mountain between Yenikieui and Ketchi-Maghara. Thenceforward the country is open and rolling.

August 20. Büyük Tatlar to Örtülü, 6 h. 14 m. The country between Büyük Tatlar and Kereikieui is very rough and mountainous. From Kereikieui we go down the gorge of the Khurman Su to Khurman Kalesi. Khurman Kalesi is a proud castle, possibly of early Turkish origin, situated on a crag just at the junction of the Maragos Tchai with the Khurman Su.

Nos. 352-354.

On the living rock twenty-three minutes northwest of Khurman Kalesi. See my Preliminary Report, p. 39, Nos. 57, 58, 59. Copy. Photographs of B and C.

Inscription *A* consists of eight heroic hexameters; *B*, of two hexameters; and *C* is an elegiac distich. *B* and *C* cannot be reached without artificial help, which everywhere in Turkey it is difficult to obtain. Of these two we got photographs. Inscription *A* can be reached, but only with danger to life or limb. The letters are immense, and the surface covered by the inscription is so great that only a few letters in each line can be read at a time; this done, one must climb down and then up again, it being impossible to move horizontally along the face of the rock. Copying the inscription was very laborious work, as I had to remove my shoes and support myself by my toes. First the moss was removed from the letters, then the inscription was copied, and lastly the copy was verified.

These inscriptions may be translated as follows :

A.

“ Epigram of Acilius Chrisophus, the son of Alexander ; also
called Philippius.

Once upon a time, by the counsels of the Immortals, a girl rushed down from this lofty crag and escaped unhurt from a bear. To the two villages of Philippius and Arsinous this well-known Prion is a boundary not to be disturbed. The home of Arsinous was Sarromaëna ; that of Philippius was Sobagena, at the confluence of two rivers. They were faithful comrades, and may this rock declare their unbroken friendship even to future ages.”

B.

“Of the same Chirisophus.

It is nine stadia from this rock to the fair-flowing spring of Sobagena, on the bank of the river Korax.”

C.

“Of the same Chirisophus.

Near by is Sobagena with its bright clear baths. If you will hasten a little, you may bathe yourself after your toil.”

Line 3 of *A*. By consulting my *Preliminary Report* on this journey, p. 39, it will be seen that I inserted in the uncial text the letter C in brackets, thus [C], meaning to indicate thereby that this C was not on the rock. At first it was my intention to give only the uncial text of the inscriptions, as I had done throughout the *Report*, but as I attached importance to them, I afterwards inserted the minuscule text as well. I then forgot to erase the [C] of the uncial text.

The readings of Professor Allen (*Preliminary Report*, p. 41, top) are all undoubtedly correct except [ῥ]ώμησι and ὄρος, which are clearly wrong. The inscriptions are of prime importance for the topography of this region.

A girl, when pursued by a bear, had rushed down over the almost perpendicular crag, which raises its proud head to a height of about 1500 feet. By a veritable miracle she escaped unhurt, and as a lasting memento of this great escape, two friends, Philippus and Arsinous, one possibly her father, had these inscriptions engraved on the rock. From the inscriptions it is clear: 1°, that Khurman Kalesi occupies the site of Sobagena, the village of Philippus, inasmuch as it is situated at the junction of the Maragos Tchai with the Khurman Su; 2°, it is clear that the ancient name of Khurman Su was the *Korax*; 3°, it is clear that Sarromaëna, the village of Arsinous, must have occupied the site of Maragos, which name may even be a corruption of Sarromaëna; 4°, it is clear that the mountain bore the name of Prion. Thus from these inscriptions we locate and give names to two villages, a river, and a mountain. The rock on which *A* is inscribed is certainly “a boundary not to be disturbed,” and

nine stadia is about the true distance (23 m.) from Khurman Kalesi to the rock which bears inscription *B*.

Leaving these inscriptions, we go up the little valley of the Maragos Tchai past Maragos to Topak Tash (not Toprak Tash). Here we leave the gorge, and ascend a great mountain to an elevated plateau inhabited by inhospitable Kurds.

August 21. Örtülü to Savoghlan, 9 h. 34 m. We descend by a rough mountainous road to the valley of the Seihûn. The valley is of respectable size here, and contains a number of villages. The name of the district is Saris. We were just 1 h. 16 m. in crossing the valley from mountain to mountain. In crossing the mountain west of the valley of the Seihûn 1 h. 15 m. are taken up. Thenceforward we go down a narrow valley until the open country is reached in the neighborhood of Bagtchekieui.

August 22. Savoghlan to Seresek, 6 h. 0 m. Fifty minutes west of Savoghlan we ford the Zamantia Tchai in the neighborhood of Kizilkhan. Ekrek is probably the site of an ancient town. At Karadaghi there is a good Seldjuk Khan. Seresek is the ancient Arasaxa.

August 23. Seresek to Talas, 5 h. 27 m.

August 25. Talas, *via* Kaisariye, to Indjesu, 6 h. 17 m.

August 26. Indjesu to Ürgüp, 5 h. 9 m. We travelled all day in a rain, so that our progress was slow. Leaving Indjesu, we cross a ridge, and in 2 h. 37 m. we are down at Akkieui, at the head of the, very fertile valley that leads hence to Ürgüp. Ürgüp is a prosperous town, well built of the soft volcanic tufa. The whole region of country between Ürgüp and Tatlar is in reality an extinct volcano.

August 27. Ürgüp to Udjessar, 2 h. 16 m. Martchan is the centre of the cone formations and of the rock-cut dwellings. The scenery is wonderful beyond all description. We spent this day and the most of August 28th in securing a large number of photographs of the cones and rock dwellings. The character of the rock-cut dwellings of Martchan and Udjessar is the same as that of those at Selme and Soghanlû Dere, already described above. Only here they are more abundant, and the volcanic character of the country is much more marked.

August 28. Udjessar to Nevshehir, 1 h. 10 m. Nevshehir is a large and prosperous town, with excellent mosques and theological schools.

August 29. Nevshehir to Tatlar, 2 h. 49 m. The country between the two places is one vast and barren lava-field.

August 30. Tatlar to Hadji Bektash, 5 h. 53 m. The Halys is wide, but not deep, at the point where we forded it. North of Salanda we crossed a spur of Khirka Dagħ to the great plain of Hadji Bektash, the headquarters of the Dervishes and the tomb of Hadji Bektash himself. We were entertained with distinction by the Dervishes. There are great salt-mines in the neighborhood.

September 1. Hadji Bektash to Karaseñir, 7 h. 29 m. It was my purpose to explore the unknown region between Hadji Bektash as well as could be done on a straight march. The results are laid down in the map of Northern Cappadocia which accompanies this volume.

The country northeast of Hadji Bektash, as far as Tchroprun Oghlu is mostly level. Here we go down the gorge of a little river to Doiduk, then cross a ridge to Kazaklı, from which point we traverse a plain to Karaseñir.

September 2. Karaseñir to Hadji Shefa'atli, 5 h. 27 m. Between Karaseñir and Kediler the country is undulating; at Kediler the plain of Pashakieui is entered.

September 3. Hadji Shefa'atli to Yerkieui, 5 h. 48 m. Fourteen minutes east of Hadji Shefa'atli is the junction of the Kara Su with the Kanak Su; henceforward the united stream is called the Delidje Irmak. At this point it enters a cañon, which continues as far as Öyük, where it enters the plain. This cañon is so abrupt and precipitous that the road cannot follow it, but ascends to an elevated plateau, on which are the villages Djafali and Adjikoyun. From this point there is a gradual descent to the cañon, which is still impassable, and the road crosses a series of ridges on the right bank of the river to Öyük.

September 4. Yerkieui to Böyük Nefezkieui, 4 h. 42 m. We travelled very rapidly from Boyalik to Böyük Nefezkieui.

No. 355.

Boyalik (called also Medjidie). Panel in a slab. Copy.

The number of miles is given in both Latin and Greek, as seems to be indicated by the horizontal bar over the T̄. This becomes certain when the milestone found by Professor Hirschfeld at Iskelib [see Hirschfeld's article *Tavium* in the *Sitzungsberichte der königl. preuss. Akademie der Wissenschaften zu Berlin*, 1883, Vol. LIII. p. 1256, and *Ephemeris Epigraphica*, 1884, p. 39, No. 81] is compared with the inscription given above. It, too, records a repair of roads by this same legate Pomponius Bassus and its numerals

M I L . P . L $\overline{\text{X X X}}$
 T̄

are certainly bilingual.

Two other inscriptions of this legate are known [see *C.I.L.* III. 309, and *Journal of Philology*, 1882, p. 155 = *Ephemeris Epigraphica*, 1884, p. 39, No. 82].

For a discussion of the date when T. Pomponius Bassus governed Galatia, Cappadocia, Pontus, etc., see *Journal of Philology*, 1882, pp. 155, 156; *Bullettino dell' Istituto*, 1844, p. 125 sqq., 1862, pp. 67, 68; *Annali dell' Istituto*, 1844, pp. 14 and 40; Eckhel, *Doct. Num.*, III. p. 190; Mionnet, *Suppl.* 7, pp. 632, 665, 669; Perrot,

de Galat. prov. Rom., p. 111. Pomponius Bassus is mentioned as *πρεσβευτῆς* in an inscription of Ephesus recently published in the *Mittheilungen des Deutschen Archaeologischen Institutes in Athen*, 1885, p. 401.

The above inscription (No. 356) is one of the most important discoveries of the journey. The ancient Tavium was the *ἐμπόριον τῶν ταύτην*. It was of prime importance geographically, because it was the centre from which diverged seven roads, five of which are given in the Peutinger Table, and the remaining two in the Antonine Itinerary. Distances along these roads were measured from Tavium; consequently it was of the highest importance to discover the real site of Tavium, for on it depends the geography of the whole country between Ancyra and Amasia. Tavium has been located by different scholars at Tchorum, Böyük Nefezkieui, Boghazkieui; but until recently those best entitled to an opinion had settled on Böyük Nefezkieui as the true site, but always, be it understood, without any documentary proof. In November, 1883, Professor Gustav Hirschfeld, of Königsberg, published an article "*Tavium*" in the *Sitzungsberichte der Academie der Wissenschaften zu Berlin*, in which he declined to accept for Tavium any of the sites hitherto suggested. He attempts to show that Tavium must be sought on the left bank of the Halys, and that its site is occupied by *Iskelib*, a degree north of Böyük Nefezkieui. In January, 1884, Professor Heinrich Kiepert published in the *Sitzungsberichte* (as above) his *Gegenbemerkungen zu der Abhandlung des Hrn. G. Hirschfeld über die Lage von Tavium*, from which it appears that he is very loath to give up the site of Böyük Nefezkieui as that of Tavium; but he finally suggests Aladja, or a point immediately southeast of Aladja.

Now my inscription (No. 356) is the first milestone from somewhere, and as distances in this region were reckoned from Tavium, it necessarily follows that it is the first milestone on the Roman road from Tavium to Ancyra, and consequently Tavium is located beyond dispute at Böyük Nefezkieui. But to make the matter doubly sure there is still another point to be taken into consideration. In the cemetery of Tamba Hassan, a village just two hours north of Böyük Nefezkieui, Mr. Haynes found Roman millaria, one of which bore the badly defaced inscription No. 377. Now, as I understand it, Tamba Hassan is none other than the *Tomba* or *Tonea* of the

Peutinger Table, the first station on the Roman road from Tavium to Comana in Pontus. Hirschfeld points out that Tomba and Tonea are two names for the same place. It must be noted that the distances, as given by the Peutinger Table, viz. Tonea XIII and Tomba XVI MP. from Tavium, do not agree accurately with my identification, and I should rather look for VIII instead of either XIII or XVI. The Table is almost certainly in error, and the identification both of Tavium and Tomba remains fixed.

It has been stated that the ruins of Böyük Nefezkieui are too insignificant to represent Tavium. This is not the case. It is true that at the village itself there are only comparatively small fragments; but the cemeteries, both of Kötlak and the one in which No. 356 was found, are full of architectural fragments, and the last-mentioned cemetery has scarcely any other stones in it except cippi, columns, and fragments of epistyles, all of considerable weight and size. A future traveller will no doubt find the hot springs in the region of country between Böyük Nefezkieui and Yozgad.

I found only Roman coins at Böyük Nefezkieui, of the Caesarean coinage. The soil is very fertile, and yields abundant harvests of wheat; and the people plant nothing else.

No. 357.

Böyük Nefezkieui. Ornamented epistyle of white marble.

See Bulletin de Correspondance Hellénique, 1883, p. 26, whence it was inserted in the Ephemeris Epigraphica, 1884, p. 28, No. 42. Copy.

September 6. Boghazieui to Öyük, 4 h. 34 m. The ancient sculptures were photographed.

September 8. Öyük to Ashagha Beshbunar, 5 h. 46 m. The results henceforward were purely chorographic, and have been laid down in the map of Northern Cappadocia.

September 9. Ashagha Beshbunar to Ulaklü, 8 h. 20 m. The plain of Sungurlu comes to an end immediately west of Aghabunar,

from which place the country is hilly to the Delidje Irmak. At Taobas we ascend a large mountain, which turns out to be the bluff of a great elevated plateau which extends from this point westward to the Kizil Irmak (Halys).

September 10. Ulaklı to Yalüm, 7 h. 14 m. In 6 h. 14 m. we reach the bridge over the Halys. The gorge through which the river flows abounds in vineyards, the ripe fruit of which was being converted into raisins. Hence a rough ascent of one hour to Yalüm.

September 11. Yalüm to Arablar, 9 h. 51 m. We traverse a rough country for 5 h. 41 m., when we reach the wagon road from Angora to Kaledjik.

No. 378.

Ortakieui. In the cemetery. See Preliminary Report, p. 45, No. 62. Copy.

IMPCAESVAI

victo Aug(usto) trib(uniciae)
5 pot(estatis) II Co(n)s(ul) I
M(ilia) P(assuum)? or else $\mu(\acute{\iota}\lambda\iota\alpha)$ ρ' .

A mate to this inscription, found at Tchañly Kaya, an hour south of Ancyra, is *C.I.L.* III. 316. The date of both is 223 A.D.

If the reading of line 6 be $\mu\acute{\iota}\lambda\iota\alpha$ ρ' , then this is the one hundredth milestone from Tavium on the road to Ancyra.

September 12. Arablar to Angora, 0 h. 58 m. At Angora we were compelled to consider our journey finished, scientifically speaking. It was necessary for Mr. Haynes to reach Nicomedia by a certain day, in order to take the evening train for Constantinople, and our one thought thenceforth was to travel westward as rapidly as possible. For the sake of completeness I give the time from Angora to the railway terminus at Ismid.

- September 13. Angora to Ayash, 7 h. 34 m.
- September 14. Ayash to Kavun Ovası Tchiftlik, 8 h. 59 m.
- September 15. Kavun Ovası Tchiftlik to Nali Khan, 7 h. 16 m.
- September 16. Nali Khan to Köstebek, 5 h. 54 m.
- September 17. Köstebek to Torbalı, 8 h. 40 m.
- September 18. Torbalı to a Khan, 8 h. 31 m.
- September 19. Khan to Sabandja, 9 h. 43 m.
- September 20. Sabandja to Ismid, 5 h. 33 m.

ADDITIONAL NOTES.

No. 12 has been published by Ramsay in the *American Journal of Archaeology*, 1888, p. 346.

No. 21. Those who may be interested in "descent reckoned *μητρόθεν*" will find a treatment of the subject in Treuber's *Geschichte der Lykier*, p. 117 sqq.

Page 26, May 31. I have ascribed the identification of Apollonia to Paris and Holleaux, but Waddington located Apollonia at Medet before them.

No. 32. Published by Smith in the *Journal of Hellenic Studies*, 1887. The *Journal* is inaccessible to me, and I have not seen Smith's article.

No. 34. Published by Smith in the *Journal of Hellenic Studies*, 1887.

No. 35. Published by Ramsay in the *American Journal of Archaeology*, 1887, p. 365. In his uncial text, lines 10-12, he reads :

Γ Α Λ Ω Ν Ι Α
 Ε Β Α Κ Τ Η Ι Ι Η Τ Γ Ι Λ Λ Κ Α
 Λ Ι Ο Ι ' Β Υ Ι

and transcribes lines 9-12 as follows :

Σεπ-

τιμίῳ Γέτα νίϙ? τῶν
 με]γάλων [Β]α[σιλέων καὶ Ἰουλίᾳ
 Σεβαστῇ μητέρα (sic) Κά[στρον.
 Ἄ[π]δ [Κ]ιβύ[ρας Μιλια δυώδεκα?

No. 36. Published by Smith in the *Journal of Hellenic Studies*, 1887.

No. 37. Published by Ramsay in the *American Journal of Archaeology*, 1887, p. 363. In line 1 he reads A; in line 3, end, NA; in line 6, init., KAI.

Page 38, June 6. Ramsay says that Vimru Tash is the true name. I cannot agree with him.

Nos. 43, 44 (46). Ramsay writes that he verified the numerals of these inscriptions in 1886, and thinks that the date is ΠΤΒ.

Nos. 56-58. Published by Smith in the *Journal of Hellenic Studies*, 1887.

Nos. 62-63. Published by Smith in the *Journal of Hellenic Studies*, 1887.

No. 64. Ramsay (in the *American Journal of Archaeology*, 1887, p. 363) identifies Θεὸς Σώζων with Σαβαΐας. The god Σώζων is named on coins of Antiochia ad Maeandrum also.

It should be noted that if the era be the Asiatic, then the date of the inscription is either (TKZ) 243 or (TZ) 223 A.D.

No. 65. Published by Ramsay in the *American Journal of Archaeology*, 1887, p. 362.

If the era be the Asiatic, then the date is 168 A.D.

Nos. 72-75. Published by Smith in the *Journal of Hellenic Studies*, 1887. I have not seen his article.

No. 82. Published by Smith in the *Journal of Hellenic Studies*, 1887.

No. 83. Published by Smith in the *Journal of Hellenic Studies*, 1887.

No. 84. Ramsay now identifies the ancient site near *Einesh* with "Tymbrianasa, the modern name being the second half of the ancient name."

ADDENDA.

Nysa. In December, 1886, M. Mich. Pappa Konstantinou wrote to me concerning an inscription now in the village Aktche, near Nysa, as follows:

Εἷς τινα Τουρκικὴν οἰκίαν ἀνεκάλυψα ἐν ψήφισμα ΝΥΞΑΕΩΝ
 ἐκ τριάκοντα καὶ πλέον γραμμῶν ἀναφερόμενον εἰς τὴν ἐποχὴν
 ΠΥΘΟΔΩΡΟΥ τινος, ἴσως αὐτὸν ὃν ἀναφέρει ὁ Στράβων (12. 555
 and 14. 649. See also Cicero, *pro Flacco*, 22, 52: Ubi erant illi
 Pythodoro, Archidemi, Epigoni, ceteri homines apud nos noti, inter

suos nobiles? Cf. *Papers of the American School at Athens*, I. p. 96). Ἡ ἐπίρροια τῆς ἀτμοσφαίρας ἔχει βλάβει τὴν ἐπιφάνειαν τῆς ἐπιγραφῆς καὶ δι' ἐμὲ ἡ ἀντιγραφὴ καθίσταται δύσκολον ἄνευ σφαλμάτων.

I mention this inscription here in the hope that some traveller may be induced to hunt it up, and secure a copy before it be totally defaced by the weather.

AMERICAN SCHOOL OF CLASSICAL STUDIES AT ATHENS.

1887-1888.

TRUSTEES.

A corporation was formed in March, 1886, under the statutes of the Commonwealth of Massachusetts, with the name of "The Trustees of the American School of Classical Studies at Athens," to hold the title to the land and building in Athens belonging to the School, and to hold and invest all permanent funds which may be received for its maintenance.

The Board consists of the following gentlemen : —

JAMES RUSSELL LOWELL, Cambridge, *President*.
MARTIN BRIMMER, Boston.
HENRY DRISLER, New York.
BASIL L. GILDERSLEEVE, Baltimore.
WILLIAM W. GOODWIN, Cambridge, *Secretary*.
HENRY G. MARQUAND, New York.
CHARLES ELIOT NORTON, Cambridge.
FREDERIC J. DE PEYSTER, New York.
HENRY C. POTTER, New York.
WILLIAM M. SLOANE, Princeton.
SAMUEL D. WARREN, Boston, *Treasurer*.
JOHN WILLIAMS WHITE, Cambridge.
THEODORE D. WOOLSEY, New Haven.

EXECUTIVE COMMITTEE OF THE TRUSTEES.

JAMES RUSSELL LOWELL.		CHARLES ELIOT NORTON.
WILLIAM W. GOODWIN.		SAMUEL D. WARREN.

MANAGING COMMITTEE.

THE AMERICAN SCHOOL OF CLASSICAL STUDIES
AT ATHENS.

THE American School of Classical Studies at Athens, founded by the Archæological Institute of America, and organized under the auspices of some of the leading American Colleges, was opened October 2, 1882. During the first five years of its existence it occupied a hired house on the 'Οδὸς Ἀμαλίας in Athens, near the ruins of the Olympieum. A large and convenient building has now been erected for the School on a piece of land, granted by the generous liberality of the Government of Greece, on the southeastern slope of Mount Lycabettus, adjoining the ground already occupied by the English School. This permanent home of the School, built by the subscriptions of its friends in the United States, will be ready for occupation early in 1888. During the first months of 1887-88, the School has been accommodated in temporary quarters in the city.

The new building contains the apartments to be occupied by the Director and his family, and a large room which will be used as a library and also as a general reading-room and place of meeting for the whole School. A few rooms in the house are intended for the use of students. These will be assigned by the Director, under such regulations as he may establish, to as many members of the School as they will accommodate. Each student admitted to the privilege of a room in the house will be expected to undertake the performance of some service to the School, to be determined by the Director; such, for example, as keeping the accounts of the School, taking charge of the delivery of books from the Library and their return, and keeping up the catalogue of the Library.

The Library now contains about 1,500 volumes, exclusive of sets of periodicals. It includes a complete set of the Greek classics, and the most necessary books of reference for philological, archæological, and architectural study in Greece.

The advantages of the School are offered free of expense for tuition to graduates of the Colleges co-operating in its support, and to other American students who are deemed by the Committee of sufficient promise to warrant the extension to them of the privilege of membership. It is hoped that the Archæological Institute may in time be supplied with the means of establishing scholarships, which will aid some members in defraying their expenses at the School. In the mean time, students must rely upon their own resources, or upon scholarships which may be granted them by the Colleges to which they belong. The amount needed for the expenses of an eight months' residence in Athens differs little from that required in other European capitals, and depends chiefly on the economy of the individual.

A peculiar feature of the temporary organization of the School during its first six years, which has distinguished it from the older German and French schools at Athens, has been the yearly change of Director. This arrangement, by which a new Director has been sent out each year by one of the co-operating Colleges, was never looked upon as permanent; and it has now been decided to begin the next year (1888-89) with a new organization. A Director will henceforth be chosen for a term of five years, while an Annual Director will also be sent out each year by one of the Colleges to assist in the conduct of the School. (See Regulation V.) Dr. CHARLES WALDSTEIN, of New York, now Director of the Fitzwilliam Museum of Art at the University of Cambridge, England, has been chosen Director of the School for five years beginning in October, 1888; and he has accepted the appointment on the condition that a sufficient permanent fund be raised before that time to support the School under its new organization. It is therefore earnestly hoped and confidently expected that the School will henceforth be under the control of a permanent Director, who by continuous residence at Athens will accumulate that body of local and special knowledge without which the highest purpose of such a school cannot be fulfilled. In the mean time the School has been able, even under its temporary organization, to meet a most pressing want, and to be of some service to classical scholarship in America. It has sought at first, and it must continue to seek for the present, rather to arouse a lively interest in classical archæology in American Colleges than to accomplish distinguished achievements. The lack of this interest has heretofore been conspicuous;

but without it the School at Athens, however well endowed, can never accomplish the best results. A decided improvement in this respect is already apparent; and it is beyond question that the presence in many American Colleges of professors who have been resident a year at Athens under favorable circumstances, as annual directors or as students of the School, has done much, and will do still more, to stimulate intelligent interest in classic antiquity.

REGULATIONS OF THE AMERICAN SCHOOL OF CLASSICAL
STUDIES AT ATHENS.

I. The object of the American School of Classical Studies is to furnish an opportunity to study classical Literature, Art, and Antiquities in Athens, under suitable guidance, to graduates of American Colleges and to other qualified students; to prosecute and to aid original research in these subjects; and to co-operate with the Archæological Institute of America, so far as it may be able, in conducting the exploration and excavation of classic sites.

II. The School is in charge of a Managing Committee. This Committee, which was originally appointed by the Archæological Institute, disburses the annual income of the School, and has power to add to its membership and to make such regulations for the government of the School as it may deem proper. The President of the Archæological Institute and the Director and the Annual Director of the School are *ex officio* members of the Managing Committee.

III. The Managing Committee meets semi-annually, in New York on the third Friday in November, and in Boston on the third Friday in May. Special meetings may be called at any time by the Chairman.

IV. The Chairman of the Committee is the official representative of the interests of the School in America. He presents a report annually to the Archæological Institute concerning the affairs of the School.

V. 1. The School is under the superintendence of a Director. The Director is chosen and his salary is fixed by the Committee.

The term for which he is chosen is five years. The Committee provide him with a house in Athens, containing apartments for himself and his family, and suitable rooms for the meetings of the members of the School, its collections, and its library.

2. Each year the Committee appoints from the instructors of the Colleges uniting in the support of the School an Annual Director, who resides in Athens during the ensuing year and co-operates in the conduct of the School. In case of the illness or absence of the Director, the Annual Director acts as Director for the time being.

VI. The Director superintends personally the work of each member of the School, advising him in what direction to turn his studies, and assisting him in their prosecution. He conducts no regular courses of instruction, but holds meetings of the members of the School at stated times for consultation and discussion. He makes a full report annually to the Managing Committee of the work accomplished by the School.

VII. The school year extends from the first of October to the 1st of June. Members are required to prosecute their studies during the whole of this time in Greek lands under the supervision of the Director. The studies of the remaining four months necessary to complete a full year (the shortest time for which a certificate is given) may be carried on in Greece or elsewhere, as the student prefers.

VIII. Bachelors of Arts of co-operating Colleges, and all Bachelors of Arts who have studied at one of these Colleges as candidates for a higher degree, are admitted to membership in the School on presenting to the Committee a certificate from the instructors in Classics of the College at which they have last studied, stating that they are competent to pursue an independent course of study at Athens under the advice of the Director. All other persons desiring to become members of the School must make application to the Committee. Members of the School are subject to no charge for instruction. The Committee reserves the right to modify the conditions of membership.

IX. Each member of the School must pursue some definite subject of study or research in classical Literature, Art, or Antiquities, and must present a thesis or report, embodying the results of some important part of his year's work. These theses, if approved by the Director, are sent to the Managing Committee, by which each thesis is referred to a sub-committee of three members, of whom two are
